The Four Hundred Years War:

The History of Medieval Europe Lynn Thorndike, James Thomson Shotwell, 2015-06-15 Excerpt from The History of Medieval Europe Inasmuch as emigrants from all parts and from all races of Europe have long since been coming to the United States and becoming American citizens it has seemed worth while to include the states and racial groups of central and eastern Europe as well as the richer medieval history of those western European lands whose institutions and culture have thus far had the greatest influence upon our own In conformity with present tendencies in historical writing economic and social conditions are given due attention and many minor details of military and political history are omitted In these days of tottering thrones I have even ventured to lay the axe at the root of absolutism and to dispense with genealogical tables Contemporary events sadly remind us that the age of wars is not past but they have also demonstrated that an intensive study of Caesar's Commentaries and the tactics of Hastings and Cray is of little use even to the modern military specialist while they have further reminded us that in the art of the past there are precious models and inspirations whose loss is almost irreparable Since man is a reasoning and emotional being it is unfair to the past actors and uninteresting to the present readers of history merely to chronicle events without some indication of the ideas and ideals behind them as well as of the personalities that produced them But discussion of economic and intellectual influences should not be carried so far as to reduce the narrative of events in political history to a mere skeleton If wars and politics are to be discussed at all they should be treated with sufficient fullness to insure clearness and interest The background of physical geography is frequently referred to and described In the maps the aim has been to omit confusing detail and to keep them in close accord with the text As a rule all places mentioned in the text and no others are given in the accompanying maps About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Artillery of the Dukes of Burgundy, 1363-1477 Robert Douglas Smith, Kelly DeVries, 2005 A major new exploration of the history and development of gunpowder weapons in the 15th century based on the artillery of the Dukes of Burgundy The four Valois Dukes of Burgundy created in little more than a century a fabulously wealthy and independent state Their centralised control and chancellery have bequeathed to us a vast treasure trove of documents including accounts and inventories of the Masters of the artillery under the later Dukes Although many of these were extracted and transcribed in the late nineteenth century modern historians have largely ignored their unprecedented insights into fifteenth century guns and their use When Charles the Bold the last Valois Duke took on the combined Swiss confederate forces in 1476 he lost

not just the battles and his personal fortune but much of his artillery train as well. Of the dozens of cannons captured at least 25 pieces survive in Swiss museums. The documents that survive from the Valois state give us almost for the first time in medieval Europe the ability to see the course of history in a period when Europe was undergoing some of the most profound changes before the 20th century. The Artillery of the Dukes of Burgundy is the first attempt to combine all these sources bringing new and fresh insights into the development and use of artillery in the fifteenth century. Moreover this is the first modern study of medieval cannon one of the most important discoveries of the post classical world. KELLY DeVRIES has authored numerous books and articles on medieval warfare. ROBERT DOUGLAS SMITH formerly Head of Conservation in the Royal Armouries Tower of London is an acknowledged expert on medieval artillery. This study is the first major fruit of their combined researches.
