## **The French Workers Movement Economic Crisis And Political Change:**

**The French Workers' Movement** Mark Kesselman, 2018-12-07 First published in 1984 This volume brings together many of the foremost French and North American specialists on the French working class movement Although they differ substantially in their theoretical and ideological orientation they share a left perspective Their original essays provide a coherent and comprehensive analysis of the history of the movement focusing on the constraints and opportunities created by the economic crisis of the 1970s and the political change ushered in by the Socialist Party's victory in 1981

**States' Gains, Labor's Losses** Dorothy J. Solinger, 2018-07-05 In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense States Gains Labor's Losses concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective States Gains Labor's Losses emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures

*Steel, State, and Labor* Anthony Daley, 2010-11-23 The creation of wealth depends on the capacity of economic actors to adapt to market changes Such adaptation in turn poses fundamental questions about the distribution of resources Daley investigates the interaction among business labor and the state in France in the second half of the twentieth century and reveals how political dynamics refract market pressures He explains how and why profitability came at the expense of union mobilization unemployment and management autonomy vast amounts of state aid and less national control over industrial decision making

Regulating Labor Chris Howell, 2011-11-24 In May and June of 1968 a dramatic wave of strikes paralyzed France making industrial relations reform a key item on the government agenda French trade unions seemed due for a golden age of growth and importance Today however trade unions are weaker in France than in any other advanced

capitalist country How did such exceptional militancy give way to equally remarkable quiescence To answer this question Chris Howell examines the reform projects of successive French governments toward trade unions and industrial relations during the postwar era focusing in particular on the efforts of post 1968 conservative and socialist governments Howell explains the genesis and fate of these reform efforts by analyzing constraints imposed on the French state by changing economic circumstances and by the organizational weakness of labor His approach which links economic political and institutional analysis is broadly that of Regulation Theory His explicitly comparative goal is to develop a framework for understanding the challenges facing labor movements throughout the advanced capitalist world in light of the exhaustion of the postwar pattern of economic growth the weakening of the nation state as an economic actor and accelerating economic integration particularly in Europe *Het Zweedse model* Arend Buitendam, Didier A. G. Dumas, Arie C. Glebbeek, 1990 Symposium bijdragen over de vraag of de Zweedse politiek die vraag en aanbod op de arbeidsmarkt voortdurend op elkaar afstemt ook in Nederland toegepast zou kunnen worden Workers' Participation in Post-Liberation France Adam Steinhouse, 2001-12-05 Workers Participation in Post Liberation France is a vivid portrait of French labor's failure to achieve greater industrial democracy Drawing on original archival research Adam Steinhouse recasts the traditional view of this critical period of French history demonstrating the fundamental importance of the immediate post liberation period in determining the future course of industrial relations in France He brings to life the labor disputes of the 1940s charting the interplay between industry and politicians that dealt a crushing blow to organized labor's demands for political change Steinhouse captures the rise of state intervention in the economy and plots the growth of French employers organized intransigence in the face of workers collective action which culminated in a series of actions effectively marginalizing labor's voice in the economic boom of the early 1950s Steinhouse's impressive scholarship provides an excellent case study of the French state and its efforts to balance growing worker demands for representation with the imperatives of social peace and prosperity This book makes a significant contribution to modern French political history and the development of modern industrial relations *International Journal of Political Economy*, 1992 American Labour, France, and the Politics of Intervention, 1945-1952 Stephen Burwood, 1998 Studies how the two dominant U S labor centers between 1945 and 1952 the American Federation of Labor and the Congress of Industrial Organizations developed their policies and practices toward workers overseas independent of direct influence by the U S government Argues that both the CIO and the AFL urged French workers and their unions to reject Communism in favor of cooperation with employers and the state in order to increase productivity raise wages stimulate consumption and generate a more broadly based prosperity in France Annotation copyrighted by Book News Inc Portland OR **The Politics of Immigrant Workers** Camille Guerin-Gonzales, Carl Strikwerda, 1998 Comprises 12 contributions from anthropologists economists and labor historians who explore the rise of the global working class in the 19th and 20th centuries They examine agricultural and industrial laborers in important

streams of immigration including Europeans to the US Third World workers to Western Europe Asian workers to Africa and Mexican migration to the US Annotation copyrighted by Book News Inc Portland OR *Labor Studies Journal* ,1985

Foglesong,Joel Wolfe,1989-10-11 This study considers both the determinants of a government's choice between adjustment strategies for the transformation of mature industrial economies and how that choice affects the nature of liberal democracy *European Politics in Transition* Mark Kesselman,1987 This critically acclaimed best selling text offers a comprehensive introduction to the post World War II political systems of Great Britain France Italy Germany and the European Union The concept of European politics in transition is presented through four key themes the role of each country in economic management the interaction of countries within the international order challenges facing European democracies and the political impact of social diversity **Foreign Language Index** Public Affairs Information Service,1984 **The Cumulative Book Index** ,1985 A world list of books in the English language **Democracies at the Crossroads** Mark Kesselman,1996 The editors have written this book to help students analyze the problems confronting some important democracies throughout the world and to equip them with an understanding of where these countries may be headed politically once they move beyond the current crossroads The wide range of cases provided enables students to analyze continuities and contrasts among democratic regimes In the book the editors emphasize patterns of state formation political economy domestic politics and the politics of collective identities within the context of an international political and economic system Pref [American Book Publishing Record](#) ,1984 **Historical Dictionary of France** Gino Raymond,1998-11-13 Enables the non specialist reader to understand how perceptions of France have been established abroad and reminds the specialist reader of the forces that shaped modern France [Trade Unionism Since 1945](#) Craig Phelan,2009 Overview This book offers the detailed historical background required for a holistic appreciation of current problems faced and the possibilities for revitalisation In two volumes it provides introductory overviews of trade union development since the end of World War II in 26 countries from every corner of the globe Each chapter explains the main contours of trade union growth and development in one country from the pivotal year 1945 to the present Each chapter assesses the often dynamic expansion of trade unionism in the 1950s and 1960s the role of trade unionism in the movements for national liberation in the Global South and the erection of social welfare systems in the developed North the economic shocks that resulted in membership decline and loss of political influence from the late 1970s onward the economic restructuring and growing labour market diversity of the 1980s and 1990s that undercut the traditional bases of trade union membership and the historical roots of the contemporary political and economic context in which revitalisation efforts are taking place
