

## HELIPAD

Helicopters transport crew and supplies to the remote offshore site. With many flights going to North Sea platforms, Aberdeen is the world's busiest heliport.

## PRODUCTION WELLS

These pipes can stretch for several kilometres to reach the reservoirs. The oil and gas are taken up to the platform.

## DERRICK

This tower has pulleys and cables to help install new sections of pipe as the wells get deeper.

## GAS FLARE

When unwanted gas comes up with oil that cannot be stored or used, it is burned off to reduce the risk of fire or explosion.

## PIPELINE TO SHORE

The extracted oil and gas are separated at the platform. A grid of pipelines takes the oil and gas from multiple platforms to shore.
