Proceedings of the Royal Geographical Society of London Royal Geographical Society (Great Britain),1876 *Mobility Justice* Mimi Sheller,2018-09-25 Mobility justice is one of the crucial political and ethical issues of our day We are in the midst of a global climate crisis and extreme challenges of urbanization At the same time it is difficult to ignore the deaths of thousands of migrants at sea or in deserts the xenophobic treatment of foreign born populations refugees and asylum seekers as well as the persistence of racist violence and ethnic exclusions on our front doorstep This in turn is connected to other kinds of uneven mobility relations between people access to transport urban infrastructures and global resources such as food water and energy In *Mobility Justice* Mimi Sheller makes a passionate argument for a new understanding of the contemporary crisis of mobility She shows how power and inequality inform the governance and control of movement connecting these scales of the body street city nation and planet into one overarching theory of mobility justice This can be seen on a local level in the differential circulation of people resources and information as well as on an urban scale with questions of public transport and the right to the city On the planetary scale she demands that we rethink the reality where tourists and other kinetic elites are able to roam freely the military origins of global infrastructure and the contested politics of migration and restricted borders *Mobility Justice* offers a new way to understand the deep flows of inequality and uneven accessibility of a world in which the mobility commons has been enclosed *The Future of Post-human Geography* Peter Baofu,2012-01 this book provides an alternative better way to understand the future of geography especially in the dialectic context of environments and their interactions while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other In other words this book offers a new theory that is the interventive reshaping theory of geography If successful this seminal project is to fundamentally change the way that we think about geography from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate
