## **Skills In Neighborhood Work:**

**Skills in Neighbourhood Work** Paul Henderson, David N. Thomas, 2012-11-27 Skills in Neighbourhood Work is a practice textbook. It explains the skills, knowledge and techniques needed by community workers and other practitioners to work effectively in and with communities. While the principles and methods it describes have stood the test of time, the political, economic and social changes which have taken place since the book was first published have made new editions essential. Rewritten and updated and including new practice examples, the fourth edition retains all the practical information needed by the student or practitioner but sets it in the contemporary context. Including a European perspective and views from America and Australia, it covers starting, supporting and ending work with community groups, evaluation, data collection, goals and priorities, making contacts, group work, helping groups work with other organisations. This invaluable textbook is essential reading for students and practitioners of community work.

The text also explores the diverse range of social work practice methods available and aims to equip the reader with a foundation in the history and application of these varied approaches. Offering a step by step discussion that will empower readers to critically develop and refine their professional toolkit for purposeful and innovative intervention, this original rationale is an essential resource for any social work student or practitioner looking to build or consolidate their understanding of the range of methods and skills available for effective professional practice.
