During his two decades spent in Uganda working for the Colonial Medical Service Burkitt made his first major contribution to cancer research the characterization of Burkitt's lymphoma and its possible viral cause Following his return to England in 1966 he turned his attention to the cause of Western Diseases especially the role of dietary fibre in the prevention of disease and promotion of health This earned him even wider international recognition and helped to inspire what is a vital field of research today The book examines Burkitt's personal views of the world around him including his experiences as a committed evangelical Christian who had been raised an Irish Protestant and the challenges both familial and cultural that this elicited from and towards him and his scientific work The lymphoma and later the fibre story propelled Denis into an orbit of worldwide travel fame and many honours An engaging speaker but man of great humility always giving the credit for much of what he did to others he left a legacy of evidence and ideas for the causes of cancer and prevention of disease from which we all now benefit
