The Lost Fragments:

Middleware 2010 Indranil Gupta, Cecilia Mascolo, 2010-11-26 We are pleased to welcome you to the eleventh edition of the Middleware conference. The program this year is a sign of the robustness, activity and continued growth of the Middleware community. As computing technology around us has evolved rapidly over the past decade, our notions of middleware have also adapted so that we stay focused on the most challenging and relevant problems for the present and future. As a result, this year's program features papers that belong to both traditional areas as well as new directions. Cloud computing, social middleware, and transactional memory are some of the vanguard areas that you will find in this year's selection of papers. In addition, topics that have always been central to the community are also prominent this year, including publish/subscribe, multicast, reliability, legacy, location awareness, trust, and security. The community's wise evolution reflects the dynamic role that middleware continues to play in the development of current software systems. The program underscores the competitive selection process applied by us and the technical program committee: out of 116 papers submitted this year, we accepted 18 for regular publication. In addition, *Middleware 2010* also includes a new category of Big Ideas Papers, which are bold white papers with the potential to drive longer-term innovation in the field. We selected one big idea paper this year. Our industrial track once again brings forth papers that explore middleware foundations in the context of industrial practice. Finally, multiple workshops and a doctoral symposium round off *Middleware* this year, making it an attractive conference for students, faculty, researchers, and practitioners.

Data Management in Grid and Peer-to-Peer Systems Abdelkader Hameurlain, A Min Tjoa, 2011-08-19 This book constitutes the refereed proceedings of the 4th International Conference on Data Management in Grid and Peer-to-Peer Systems, Globe 2011, held in Toulouse, France, in September 2011, in conjunction with DEXA 2011. The 12 revised full papers presented were carefully reviewed and selected from 18 submissions. The papers are organized in topical sections on data storage and replication, semantics for P2P systems, and performance evaluation, resource discovery, and routing in mobile P2P networks, and data stream systems, and large-scale distributed applications.

Healing of the Goddess Sian, 2013-05-08 Sian is an experienced clairaudient, clairvoyant, and clairsentient channel of Light who has dedicated many years of her life to the pursuit of helping others improve theirs. Now, in *Healing of the Goddess*, she brings readers within a life-changing experience and the epiphany that it inspired. After her soul was imploded by a massive psychic force, she developed breast cancer, causing a near-death experience that took fifteen years from her life. As she describes an extraordinary experience in her healing journey, the hand of God encapsulated her soul with Light, giving her the strength and faith to endure a long healing process to reinstate her body back to life. She explains how breast cancer was the result of a karmic strike and how the Keys of Transformation allowed her to be healed. Cancer, she has come to understand, is a trial by tribulation. *The Healing of the Goddess* explores the cause and effect factors that are the real underlying causes of disease and recalls Sian's journey of self-healing and transformation. The challenge we all face is to truly understand the nature of life.
