**Historical Dictionary of the Netherlands** Joop W. Koopmans, 2015-11-05 The Kingdom of the Netherlands is a small but heavily populated country with almost 17 million inhabitants It is one of the last kingdoms in Europe and in 2015 it celebrated its 200 years anniversary The Netherlands became a kingdom after the Napoleonic era During this period it was transformed into a centralized state Before those years it had been one of few republics in Europe for about two centuries That state was a confederacy which emerged in the 1580s during its independence struggle against the Spanish Habsburgs Although the present state is still monarchical the Netherlands functions as a modern constitutional democracy in which the king's position is almost comparable with a ceremonial presidency The majority of the Dutch population however appreciates the hereditary political presence of the House of Orange Nassau regarding this dynasty as a symbol of national unity and connection with the country's past This third edition of Historical Dictionary of the Netherlands contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 900 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about the Netherlands **The Low Countries** Stichting Ons Erfdeel, 1993 **The**

**Helmholtz Legacy in Physiological Acoustics** Erwin Hiebert, 2014-06-12 This book explores the interactions between science and music in the late nineteenth and early twentieth century It examines and evaluates the work of Hermann von Helmholtz Max Planck Shoh Tanaka and Adriaan Fokker leading physicists and physiologists who were committed to understanding crucial aesthetic components of the art of music including the standardization of pitch and the implementation of various types of intonations With a mixture of physics physiology and aesthetics author Erwin Hiebert addresses throughout the book how just intonation came to intersect with the history of keyboard instruments and exert an influence on

the development of Western music He begins with the work of Hermann von Helmholtz a leading nineteenth century physicist and physiologist who not only made important contributions in vision optics electrodynamics and thermodynamics but also helped advanced the field of music theory as well The author traces the Helmholtzian trends of thought that become inherently more complex by reaching beyond the sciences to perform a bridge with aesthetics and the diverse ways in which the human mind interprets or is taught in different cultures to interpret and understand music Next the author explores the works of other key physicists and physiologists who were influenced by Helmholtz and added to his legacy He examines Japanese music theory student Shoh Tanaka who sought to design a harmonium that was not based on equal temperament but rather on just intonation Dutch physicist Adriaan Daniel Fokker who arranged for organs to be built based on 31 tones per octave orchestrated concerts for these new instruments and even attempted to compose microtonal music or music whose tonality is based on intervals smaller than the typical twelve semitones of Western music **Jaarverslag** Instituut voor Nederlandse Geschiedenis,2005 The Poet and the World Joachim Yeshaya, Elisabeth Hollender, Naoya Katsumata, 2019-07-08 A collection of seventeen essays on pre modern Hebrew poetry in honor of Wout van Bekkum The articles in this volume all seek to examine how the religious cultural and social context in which the poet functioned impacted on and is visible either explicitly or more elliptically in their poetical oeuvre For this purposes a broad understanding of world has been accepted including both the natural world and the constructed one society culture language as well as the spiritual and emotional world History a pillar of the man made constructed world has been used to determine the boundaries from Late Antiquity to the Middle Ages and in instances where the topic connects to older traditions to Early Modern Judaism i e pre modern Hebrew and Aramaic poetry The articles in this volume in the breadth of their temporal and spatial range and their multiplicity of approaches and methodologies highlight the richness of contemporary scholarship on Hebrew poetry The volume invites the reader to engage with this astonishing body of poetry while providing a glimpse into the world of the payanim and the cultures and societies from which they drew their inspiration and to which they made such important contributions Bibliographic Index ,2008 Handbook of the Economics of Art and Culture Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the

cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world *The Low Countries* Jozef Deleu, 1998 *Historical Dictionary of Belgium* Robert Stallaerts, 2007 In 1830 the inhabitants of the southern part of the United Kingdom of the Netherlands revolted against King William I The National Congress then declared independence and proclaimed the installation of a parliamentary monarchy and thus the new country of Belgium was created Belgium's vibrant culture and society have produced such artists as Peter Paul Rubens Jan Van Eyck and Antoon Van Dijk as well as the influential scientists Gerardus Mercator and Andreus Vesalius Brussels the country's capital city also houses the headquarters of the European Union and the North Atlantic Treaty Organization This second edition of the Historical Dictionary of Belgium relates the history of this country through a detailed chronology an introduction appendixes a bibliography and cross referenced dictionary entries on some of the more significant persons places and events institutions and organizations and political economic social cultural and religious facets Contemporary Music in the Low Countries Emile Wennekes, Mark Delaere, 2006 *The Low Countries* Jozef Deleu, 2003 **Monatshefte**, 2007 **The Low Countries**, 2001 The Low Countries is a yearbook aimed at presenting to the world the culture and society of the Dutch speaking area which embraces both the Netherlands and also Flanders the northern part of Belgium The articles in this yearbook survey the living contemporary culture of the Low Countries as well as their cultural heritage It provides information about literature and the arts but also about broad social and historical development in Flanders and the Netherlands **The Low Countries** Stichting Ons Erfdeel, 2000 **TLC** Luc Devoldere, 2005 **The Last to Leave** Dirk van Bastelaere, 2005 Dirk van Bastelaere born 1960 is regarded as one of the leading poets in Flanders He came early to prominence with his first collection Vijf jaar Five Years 1984 which was awarded the prize for the best first collection In 1988 he published Pornschlegel en andere gedichten Pornschlegel and other poems one of the most hotly debated collections of Flemish poetry in recent times and a volume that was to win for him recognition as the most important postmodern poet in Flanders His work has been strongly influenced by American poets such as Gertrude Stein and John Ashbery and makes many references to contemporary art and culture a fact which has led some critics to attack his work for its perceived intellectualism The younger generation of Flemish poets however looks to him as mould breaker In 2000 the volume Hartswedervaren Happenings of the Heart appeared and is widely regarded as his
