Skywatcher Societies Kaia Stonebrook, 2025-03-29 Skywatcher Societies explores the sophisticated astronomical knowledge of ancient indigenous cultures worldwide revealing how they observed tracked and integrated celestial events into their daily lives Moving beyond a Eurocentric view of science the book highlights the ingenuity of these societies in developing complex systems for agriculture ritual and social structure without modern technology Discover how monuments were strategically aligned with astronomical events and how ancient observatories like Mesoamerican pyramids and European stone circles were used to track the sun moon and stars The book begins by introducing fundamental astronomical concepts and indigenous observation methods Progressing across chapters it examines the construction and function of ancient observatories and analyzes monument alignments for agricultural calendrical and ritual purposes Through archaeological surveys ethnographical studies and archaeoastronomical analyses Skywatcher Societies demonstrates that indigenous civilizations possessed advanced astronomical knowledge integral to their cultures This knowledge reframes our understanding of scientific development as a multi faceted phenomenon not solely a Western progression

Rice, 2007-12 In Maya Political Science Time Astronomy and the Cosmos Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between timekeeping and Maya political organization sparked Rice s interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In Maya Calendar Origins she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early

rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized becoming the foundation for societal order political legitimization and wealth Rice's research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems *The Chinese Calendar* Lisa DeMauro, 1998
