The Live Classroom:

Community Building in the Online Classroom Dominique Moyse Steinberg, 2021-06-15 This book offers theories principles and strategies for developing the online classroom as a deep and full learning community that students feel is truly about by and for them To be immediately useful it offers practical ideas for helping students to actively contribute to shaping classroom affairs toward relevance and meaning However in order to elevate the discussion beyond the primer level the book anchors those ideas in social and educational principles and theories As social learning theories posit deep and full learning occurs when our full cognitive emotional and social selves are engaged This book mitigates the challenges to such engagement in the virtual classroom arguing that a strong sense of community ownership will enhance students ability to successfully master content Although not all strategies are group based the use of groups both large and small is a primary way of helping online students to become active on their own behalf in building a learning community that meets their needs Strategies outlined here focus primarily on promoting shared authority visibility and voice and on encouraging student disclosure of needs and peer connection

Engineering Mechanics ,1891 *Connecting in the Online Classroom* Rebecca A. Glazier, 2021-12-07 Building rapport with students can revive the promise of online education leading to greater success for students more fulfilling teaching experiences for faculty and improved enrollment for universities More students than ever before are taking online classes yet higher education is facing an online retention crisis students are failing and dropping out of online classes at dramatically higher rates than face to face classes Grounded in academic research original surveys and experimental studies Connecting in the Online Classroom demonstrates how connecting with students in online classes through even simple rapport building efforts can significantly improve retention rates and help students succeed Drawing on more than a dozen years of experience teaching and researching online Rebecca Glazier provides practical easy to use techniques that online instructors can implement right away to begin building rapport with their students including

proactively reaching out through personalized check in emails creating opportunities for human connection before courses even begin through a short welcome survey communicating faculty investment in students success by providing individualized and meaningful assignment feedback hosting non content based discussion threads where students and faculty can get to know one other and responding to students questions with positivity and encouragement and occasionally also cute animal pictures She also presents case studies of universities that are already using these strategies along with specific data driven recommendations for administrators making the book valuable for faculty instructional designers support staff and administrators alike The science backed strategies that Glazier provides will enable instructors to connect with their students and help those students thrive Speaking to the paradox of online learning the book also explains that although the great promise of online education is expanded access and greater equity especially for traditionally underserved and hard to reach populations like lower income students working parents first generation students and students of color the current gap between online and face to face retention means universities are falling far short of this promise
