The Materiality of Ancient Greek Identities, 9th to 2nd Centuries BCE Emma Gooch, Jerome Ruddick, 2025-08-07

Material culture is the physical trace of what was used to construct and define identities in the past and is therefore a key source of evidence for archaeologists and ancient historians investigating ancient identities The focus of this volume is reflective of broader theoretical and methodological shifts in recent cross disciplinary

explorations of identity Through the use of case studies each chapter demonstrates the benefits and crucial need to embrace inter and multi disciplinary approaches when investigating life and society in ancient Greece In particular this book covers the ever increasing spectrum of identities across the ancient Greek world ranging from collective groups such as women migrants children and slaves to individual figures Using archaeological iconographic and textual material as the basis of each exploration the contributors seek to understand the intersectional nature of what it meant to be an individual or group within a recognised social identity in ancient Greece More specifically this involves the analysis of various types of material culture such as artefacts from burials excavated settlements figurines statuary painted pottery small finds and monuments The contributors study the material using geo spatial and architectural methods along with more traditional approaches such as epigraphy Among other conclusions the chapters investigate the experiences of identity what the experience of having a particular identity was like as far as we can ascertain in ancient Greece as represented by the archaeological material record

Polytheism and Society at Athens Robert Parker, 2005-11-24 This book is the first attempt that has ever been made to give a comprehensive account of the religious life of ancient Athens The city's many festivals are discussed in detail with attention to recent anthropological theory so too for instance are the cults of households and of smaller groups the role of religious practice and argumentation in public life the authority of priests the activities of religious professionals such as seers and priestesses magic the place of theatrical representations of the gods within public attitudes to the divine A long final section considers the sphere of activity of the various gods and takes Athens as a uniquely detailed test case for the structuralist approach to polytheism The work is a synchronic thematically organized complement though designed to be read independently to the same author's *Athenian Religion A History* Oxford 1996

[Wedding, Gender, and Performance in Ancient Greece](#) Andromache Karanika, 2024-09-17 Wedding Gender and Performance in Ancient Greece traces the wedding song tradition its imagery and its tropes as a genre that became crystallized throughout the ages It explores how wedding poetics permeates ancient Greek literature It first analyzes how explicit or implicit matrimonial references shape archaic epic

dition and become an integral part of epic discourse orally circulating texts such as wedding songs could have a life of their own but beyond their original context could also become an integral part of a different genre especially epic and drama This author discusses the multiple platforms that enrich the wedding song tradition including children s songs hymns paeans and ululations arguing for a combination of ritualized discourse with ludic childhood poetics With an approach from cognitive and trauma studies such references can be more revealing of the female experience than previously acknowledged This book resists the idea that a wedding constitutes an initiation ritual arguing that what on the surface may seem like a transition to a new phase reveals other underlying trends that work against the concept of a passage It further considers how emotion is staged and revisits the poetics of return by looking at patterns such as the eloping returning failed and dead bride Finally the theme of separation and return as an exemplification of a distinct female *nostos* is revisited in female authored poetry which helps us decode the complex interweaving of wedding performances and lamentation among other types of performance
