Long-gap Esophageal Atresia P. Wurnig, 2012-12-06 The comparison of established methods in surgery is necessary in order to evaluate the advantages or disadvantages of each We have therefore tried to include discussions of all the problems which arise in the treatment of long gap esophageal atresia The long term results of different types of colonic interposition of different stretching procedures and of simple staged surgery seemed especially worthy of discussion It was also important to describe the role of complications caused by special pathology of the trachea in esophageal atresia and their management Second new problems continue to arise with regard to the prenatal diagnosis of malformations These new aspects will continue to exert an influence on our surgical field Malformations pose severe problems for parents the growing fetus and the doctors and are lasting burdens on our task PETER WURNIG Vienna Contents I Long gap Esophageal Atresia Current Surgical Strategies in Long gap Esophageal Atresia with Regard to Endoscopy Anastomosis D BooB and J Kotlarski With 7 Figures 1 Long gap Esophageal Atresia Experience with Kato s Instrumental Anastomosis with Cervicothoracic Procedure and Primary Anastomosis and with Retrosternal Colonic Interposition W Ch Hecker With 6 Figures 9 Esophagus Replacement by Free Autologous Jejunal Mucosa Transplantation in Long gap Esophageal Atresia H Halsband With 10 Figures 22 The Outcome of Colonic Replacement of the Esophagus in Children A Ahmed and L Spitz With 3 Figures 37 Gastric Tube Esophagoplasty K D Anderson With 1 Figure 55 The Significance of Tracheal Stenosis in Esophageal Atresia **A**

Geometric Mechanism for Diffusion in Hamiltonian Systems Overcoming the Large Gap Problem: Heuristics and Rigorous Verification on a Model Amadeu Delshams, Rafael de la Llave, Tere M. Seara, 2006 Beginning by introducing a geometric mechanism for diffusion in a priori unstable nearly integrable dynamical systems This book is based on the observation that resonances besides destroying the primary KAM tori create secondary tori and tori of lower dimension It argues that these objects created by resonances can be incorporated in transition chains taking the place of the destroyed primary KAM tori The authors establish rigorously the existence of this mechanism in a simple model that has been studied before The main technique is to develop a toolkit to study in a unified way tori of different topologies and their invariant manifolds their intersections as well as shadowing properties of these bi asymptotic orbits This toolkit is based on extending and unifying standard techniques A new tool used here is the scattering map of normally hyperbolic invariant manifolds The model considered is a one parameter family which for $\epsilon = 0$ is an integrable system We give a small number of explicit conditions the jet of order 3 of the family that if verified imply diffusion The conditions are just that some explicitly constructed functionals do not vanish identically or have non degenerate critical points etc An attractive feature of the mechanism is that the transition chains are shorter in the places where the heuristic intuition and numerical experimentation suggests that the diffusion is strongest *Complications in Pediatric Surgery* Michael G. Caty, 2008-11-24 Addressing the need of pediatricians and pediatric surgeons for a one stop comprehensive text on pediatric surgery

Complications in Pediatric Surgery covers each case a physician may encounter upon treating the pediatric surgical patient from fetus to adolescent Complications in Pediatric Surgery provides separate and concise chapters each of Gas Discharge and Gas Insulation Dengming Xiao,2015-10-01 This book presents a comprehensive overview of research on environmentally friendly insulating gases in response to the urgent calls for developing alternatives to SF6 due to the increasing awareness of the threat it poses as a greenhouse gas It covers gas dielectrics SF6 and its mixtures and potential alternative gases providing fundamental information on gas discharge and gas insulation and especially focusing on the development of new environmentally friendly insulating gases over the last decade The book begins by describing the insulating and arcing characteristics of SF6 followed by an introduction to the gas dielectrics performance of SF6 gas mixtures with buffer gases The latest findings on new environmentally friendly insulating gases are described in detail and suggestions for practical application are also provided Graduate students and teachers involved in high voltage and insulation engineering can use the book as teaching material Researchers working in plasma science laser action and related applied physics fields can also benefit from the book s analytical approach and detailed data engineers from the fields of electric power operation systems and electrical manufacturing will find it a valuable reference work for solving practical problems
