History combines multi Grammy Award winner Questlove's deep musical expertise with his curiosity about history examining America over the past fifty years. Focusing on the years 1971 to the present, Questlove finds the hidden connections in the American tapestry whether investigating how the blaxploitation era reshaped Black identity or considering the way disco took an assembly line approach to Black genius. And these critical inquiries are complemented by his own memories as a music fan and the way his appetite for pop culture taught him about America. A history of the last half century and an intimate conversation with one of music's most influential and original voices, *Music Is History* is a singular look at contemporary America. An entertaining, informative, and far-reaching work meticulously excavating American culture and history with the eye of a seasoned crate-digger. *The Washington Post* **All round the year, a monthly garland [from The book of days] and key to the calendar** Thomas Miller, 1884 Military Review, 2016 **Accounts and Papers of the House of Commons** Great Britain. Physics of Time: mechanical clocks owe their development to Newtonian physics and the ultra-precise atomic timekeeping that enables GPS hinges on the predictable oddities of quantum mechanics. Along the way, Orzel visits the delicate negotiations involved in Gregorian calendar reform, the intricate and entirely unique system employed by the Maya, and how the problem of synchronizing clocks at different locations ultimately required us to abandon the idea of time as an absolute and universal quantity. Sharp and engaging, *A Brief History of Timekeeping* is a story not just about the science of sundials, sandglasses, and mechanical clocks, but also the politics of calendars and time zones, the philosophy of measurement, and the nature of space and time itself. For those interested in science, technology, or history, or anyone who's ever wondered about the instruments that divide our days into moments, the time you spend reading this book may fly, and it is certain to be well spent. **Gately's Universal Educator** Charles E.
