## **The Logic Of Relationship:**

**Real-time Relationships** Stefan Molyneux, 2017-11-23 The first commandment of Socrates was Know Thyself Real Time Relationships provides the second commandment Speak Thy Truth The first virtue is always honesty but speaking immediate emotional experiences in intimate relationships can be enormously challenging Real Time Relationships addresses the how and the why of true intimacy in love friendship politics and work Bring the power of authentic honesty to all of your personal relationships and reap the rewards of love loyalty and security for the rest of your life The Logic of Love Ruben Zimmermann, 2018-09-15 The goal of the present study unfolds in the following four ways First in analyzing Pauline writings primarily Paul's First Letter to the Corinthians it can be demonstrated that the Apostle can be described as an ethicist The hypothesis operative here is that in the sources despite their occasional and situational character and their epistolary form one can recognize a coherent system of grounds for behavior i.e. ethics I call this recognizable ethics implicit ethics Secondly this work pursues an explicit ethical interpretation of Paul's writings What does it mean to read these texts through an ethical lens I here offer an approach with which one can decipher the ethical content of a historical text This methodology for ethical analysis so called organon is not only applicable to Paul's writings but can also provide an impetus for the ethical interpretation of other NT texts and even for the literature of early Christianity and the Bible more generally The variety of forms and the complexity of the reflection in Paul's letters can in a third point enrich the discourse of theological ethics It will be seen that the rationale for his ethics is pluralistic and simply cannot be described in a one-sided manner as simply being a deontological ethics of norms Along these lines a fourth element is found in stimulating interdisciplinary debates concerning ethics If one is able to examine and describe the norms and grounds of justification in Biblical ethics using the language and forms of description utilized in modern ethical theory biblical ethics could once again gain a voice that can be taken seriously in the modern discussion of values The point is not to have Scripture per se join the discussion but for these texts to function as a laboratory Paul Ricoeur in which ethical speech and thought relevant for contemporary concerns can be inspired and encouraged In a concluding chapter this dialogue is already started by describing specific aspects of Pauline ethics against the background or moral philosophical debate e.g. bodily ethics beyond hedonism ethics of relinquishing beyond contractual ethics or ethics of love beyond Eudaimonian ethics *The Logic of the Laws* David S. Moyer, 2012-12-11 This study is directed towards providing basic background material for the understanding of South Sumatran social organisation To this end four legal codes from the first half of the nineteenth century are presented and analysed The method used in the analysis is a modification of that used by Levi Strauss for the analysis of myth The author concludes by stating Out of these detailed analyses the most significant phenomenon to emerge is the fact that a relatively small number of formal properties are distributed through a large number of structures within a single legal code and because of their formal similarities these structures are mutually reinforcing **The Logic of Relationship** Frederick S. Lande,2013-11-15 Many students ask What is the point of learning formal logic This book gives them the answer Using the methods of deductive logic Nelson Lande introduces each new element in exquisite detail as he takes students through example after example proof after proof explaining the thinking behind each concept Shaded areas and appendices throughout the book provide explanations and justifications that go beyond the main text challenging those students who wish to delve deeper and giving instructors the option of confining their course to the basics or expanding it when they wish to more rigorous levels Lande encourages students to think for themselves while at the same time providing them with the level of explanation they need to succeed It is a rigorous approach presented in a style that is informal engaging and accessible Students will come away with a solid understanding of formal logic and why it is not only important but also interesting and sometimes even fun It is a text that brings the human element back into the teaching of logic Hans Halvorson Princeton University      *Studies in Deductive Logic* William Stanley Jevons,1896      **Studies and Exercises in Formal Logic** John Neville Keynes,1884
