Dimensional Psychopathology Massimo Biondi, Massimo Pasquini, Angelo Picardi, 2018-05-30 This book presents an innovative approach to clinical assessment in psychiatry based on a number of psychopathological dimensions with a presumed underlying pathophysiology that are related to fundamental phenomenological aspects and lie on a continuum from normality to pathology It is described how the evaluation of these dimensions with a specific validated rapid assessment instrument could easily integrate and enrich the classical diagnostic DSM 5 or ICD 10 assessment The supplemental use of this dimensional approach can better capture the complexity underlying current categories of mental illness The findings from a large patient sample suggest how this assessment could give a first glance at how variable and multifaceted the psychopathological

components within a single diagnostic category can be and thereby optimise diagnosis and treatment choices Being short and easy to complete this dimensional assessment can be done in a busy clinical setting during an ordinary psychiatric visit and in an acute clinical context with limited effort by a minimally trained clinician Therefore it provides interesting and useful information without additional costs and allows research work to be performed even in difficult settings

Culture and Depression Arthur Kleinman, Byron J. Good, 2023-04-28 Some of the most innovative and provocative work on the emotions and illness is occurring in cross cultural research on depression *Culture and Depression* presents the work of anthropologists psychiatrists and psychologists who examine the controversies agreements and conceptual and methodological problems that arise in the course of such research A book of enormous depth and breadth of discussion *Culture and Depression* enriches the cross cultural study of emotions and mental illness and leads it in new directions It commences with a historical study followed by a series of anthropological accounts that examine the problems that arise when depression is assessed in other cultures This is a work of impressive scholarship which demonstrates that anthropological approaches to affect and illness raise central questions for psychiatry and psychology and that cross cultural studies of depression raise equally provocative questions for anthropology This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987 Some of the most innovative and provocative work on the emotions and illness is occurring in cross cultural research on depression *Culture and Depression* presents the work of anthropologists psychiatrists and psychologists who examine the controversies
