Life Writing and Schizophrenia Mary Elene Wood, 2013-09-05 How do you write your life story when readers expect you not to make sense How do you write a case history that makes sense when face to face with schizophrenia your ability to tell a diagnostic story begins to fall apart This book examines work in several genres of life writing autobiography memoir case history autobiographical fiction focused either on what it means to live with schizophrenia or what it means to understand and treat people who have received that diagnosis Challenging the romanticized connection between literature and madness Life Writing and Schizophrenia explores how writers who hear voices and experience delusions write their identities into narrative despite popular and medical representations of schizophrenia as chaos violence and incoherence The study juxtaposes these narratives to case histories by clinicians writing their encounters with those diagnosed with schizophrenia encounters that call their own narrative authority and coherence into question Mary Wood is

the author of *The Writing on the Wall Women's Autobiography* and the Asylum University of Illinois Press 1994 and has published articles on autobiography case history literature and psychiatry and narrative ethics in *Narrative British Journal of Medical Ethics Journal of Trauma and Dissociation* and *American Literary Realism* She teaches in the English Department at the University of Oregon

Shimrat, 1997 Brimming with hope, resistance and passion *Call Me Crazy* chronicles the story of the mad movement, a loose coalition of former mental patients and their allies who are working to build a world where locked wards and forced drugging are not acceptable solutions to suffering.

Madness, Heresy, and the Rumor of Angels Seth Farber, 1993 This is a collection of seven true stories of individuals insulted and injured by the mental health system, individuals who then fought back, broke free and rebuilt their lives. *Madness, Heresy, and the Rumor of Angels* is a work in the tradition of Thomas Szasz, R D Laing and Erving Goffman, a challenge to the delusional belief system known as psychiatry and a protest against its appalling crimes. *Harper's*, 1996

Pseudoscience in Biological Psychiatry Colin A. Ross, Alvin Pam, 1995 Lately it seems that not a day passes without the media proclaiming yet another sensational breakthrough in the search for the physical origins of mental illness. But beyond all the fanfare and media hype is there a single shred of hard empirical evidence to substantiate the existence of a gene for alcoholism or the brain chemistry behind schizophrenia? More to the point, in fact, is it scientifically sound to limit the search for the roots of mental illness to processes occurring within the body while dismissing socioeconomic, familial and experiential influences as at best mere triggering mechanisms? And if not, what harm is being done by psychiatry's current obsession with these somatic chimeras? This groundbreaking book offers answers to those questions and more. While Dr Ross and Professor Pam clearly assert from the outset that biological psychiatry is dominated by a reductionist ideology which distorts and misrepresents much of its research, this is by no means a raw polemic voiced by an overzealous opposition. Instead, it is a reasoned discourse based on a clear-sighted and methodical examination of the professional literature. Contributors to this volume include distinguished researchers and clinicians from the fields of psychiatry, psychology, sociology and psychopharmacology. Their common purpose in coming together was to alert the mental health community to the ideological blind spots and conceptual errors in the basic logic and methodology of biological psychiatry, to demonstrate the need for a more scientifically based psychiatric practice and to suggest alternative approaches to understanding and treating mental illness. Readers will find their arguments stimulating, provocative and highly persuasive. Among the cutting-edge issues they explore are the historical origins of biological psychiatry, genetics and mental illness, the current state of

psychiatric training psychopharmacology and drug therapy the public health legal and ethical implications of biological psychiatry and the funding power and politics of research This book is essential reading for all mental health professionals It also has many important things to say to health care administrators political analysts and public policy makers Of related interest **INSANITY The Idea and Its Consequences** Thomas Szasz In this provocative book Dr Thomas Szasz one of the most celebrated and controversial psychiatric thinkers of our time presents a carefully crafted systematic analysis of the precise character and practical consequences of the idea of mental illness His findings and opinions have captured the attention of organized psychiatry and given everyone concerned with the human condition a better understanding of this almost universally misunderstood disease 1990 0 471 52534 0 432 pp **CRUEL COMPASSION** Psychiatric Control of Society's Unwanted Thomas Szasz Cruel Compassion is the capstone of Thomas Szasz's critique of psychiatric practices Reexamining psychiatric interventions from a cultural historical and political economic perspective Szasz demonstrates that the main problem that faces mental health policymakers today is adult dependency He gives us a sobering look at some of our most cherished notions about our humane treatment of society's unwanted and about ourselves as a compassionate and democratic people 1994 0 471 01012 X 260 pp **Brain Disabling Treatments in Psychiatry** Peter R. Breggin, 2008 Print CourseSmart **Biological Psychiatry** Michael R. Trimble, 1988 This book looks at psychiatry as a medical discipline whose roots lie in neuropathology Beginning with a historical overview of the discipline the book then reviews several key areas of current research in brain physiology chemistry and anatomy and their relevance to psychiatric treatment Discusses the distinction between illness and development e.g. personality disorders first drawn by Jaspers examining whether psychiatrists should deal exclusively with illness and the extent to which psychiatric professionals are an appropriate and effective group for dealing with personality disorders Also looks at concepts of disease and classification using DSM III as its main diagnostic framework Structural disorders of the limbic system recent findings on schizophrenia and dementia and biological treatments are also covered **Mestiza Consciousness, Power and Knowledge** Mary K.
