Although free standing it will be particularly useful when used as a supplement to the text *Introductory Economics*. It provides a brief but thorough coverage of the A level syllabus and highlights the most common mistakes made by A level candidates. Almost every chapter includes full and comprehensive answers to recent examination questions. It will be an essential guide to all students of economics A level *Environmental and Natural Resource Economics* Jonathan M. Harris, Brian Roach, 2017-06-26 Environmental issues are of fundamental importance and a broad approach to understanding the relationship of the human economy and the natural world is essential. In a rapidly changing policy and scientific context this new edition of *Environmental and Natural Resource Economics* reflects an updated perspective on modern environmental topics. Now in its fourth edition this book includes new material on climate change the cost competitiveness of renewable energy global environmental trends and sustainable economies. The text provides a balanced treatment of both standard environmental economics and ecological economics based on the belief that these two approaches are complementary. Several chapters focus on the core concepts of environmental economics including the theory of externalities the management of public goods the allocation of resources across time environmental valuation and cost benefit analysis. Material on ecological economics includes such topics as macroeconomic scale entropy and green national accounting. Topical chapters focus on energy climate change water resources international trade forests fisheries and agriculture with an emphasis on designing effective policies to promote sustainability and a green economy. Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment. This perspective combined with its emphasis on real world policies is particularly appealing to both instructors and students. This is the ideal text for classes on environmental natural resource and ecological economics.
