Murphy, 2020-09-04 This book first published in 1993 focuses on the evolution of accounting institutions practices and standard setting in Canada. Canada's federal system complicates the jurisdictional authority for accounting matters. Austin, 1999 This text is designed primarily for those introductory financial accounting courses where the focus is on a balance between the understanding and use of accounting information and its preparation. Provided with a backdrop of contemporary management and financial concerns students will see that accounting is a significant part of the world it purports to portray and that it is not an end in itself. On the contrary students are provided the perspective that accounting

information is a critical instrument in presenting a corporation's financial picture to important external constituencies. The raising of issues and concerns springing from this orientation facilitates a focus on substance and also frames the student's learning because they have the comfort of a more familiar general business context for thinking about the accounting issue at hand. *Marketing*, 1980.
