International and Interdisciplinary Studies in Green Computing Ganesh, K., Anbudayasankar, S. P., 2012-12-31 With the growing awareness and popularity of environmental preservation research on green computing has gained recognition around the world Information technology must adopt initiatives in making computers as energy efficient as possible as well as design algorithms and systems for efficiency related computer technologies International and Interdisciplinary Studies in Green Computing provides coverage on strategic green issues and practices for competitive advantages and cost cutting in modern organizations and business sectors in order to reach environmental goals

Agricultural Policy Vítor João Pereira Domingues Martinho, 2022-11-15 This book gives insights into the agricultural policies in several countries located in different continents It is of interest to students researchers and policy

and decision makers Given the particularities of agriculture agricultural policies are indispensable for an adjusted development of farms according to the strategic objectives of each country namely the socio economic and environmental ones The question that often arises is whether the practical effects of the various policy measures are in accordance with their design and what is the effect of these policy instruments among many other causes of structural and technological change The aim of this book is to describe the main agricultural policies that have been implemented in countries such as the United States of America Brazil China India South Africa Australia as well as the European Union It also aims to analyse the real impact of these policies on the structural and technological changes of farms in the European Union As its methodology the book considers bibliometric analysis literature review and statistical approaches

Green Stormwater Infrastructure for Sustainable Urban and Rural Development Luis A. Sañudo-Fontaneda, William F. Hunt, 2021-04-22 Green Stormwater Infrastructure for Sustainable Urban and Rural Development offers some of the latest international scientific and practitioner findings around the adaptation of urban rural and transportation infrastructures to climate change by sustainable water management This book addresses the main gaps in the up to date literature and provides the reader with a holistic view ranging from a strategic and multiscale planning implementation and decision making angle down to the engineering details for the design construction operation and maintenance of green stormwater techniques such as sustainable drainage systems SuDS and stormwater control measures SCMs This book is particularly recommended for a wide audience of readers such as academics researchers and students in the fields of architecture and landscaping engineering environmental and natural sciences social and physical geography and urban and territorial planning This book is also a resource for practitioners and professionals developing their work in architecture studios engineering companies local and regional authorities water and environmental industries infrastructure maintenance regulators planners developers and legislators
