## **The Audit:**

*The Audit Failures of the Wirecard Scandal* Edgar Löw, Reinhard Heyd, 2024-07-15 Wirecard was the largest economic scandal in the history of Germany Following the collapse of Wirecard numerous lawsuits both criminal and civil by equity and debt investors were filed not only against Wirecard but also against the auditor Ernst Young This book demonstrates that a proper audit in accordance with the auditing standards would have uncovered the fraud much earlier and details what went wrong The book first deals with the fundamentals of auditing and examines the Wirecard business models from a legal and economic perspective Then the book deals with the fiduciary structure which there has been often debated When the fraud was uncovered it became clear that 1 9 billion Euros that were supposed to be in escrow accounts were not The book discusses the balance sheet mapping in detail including the related audit requirements and examines in which balance sheet item the amounts allegedly in escrow accounts should have been reported before examining and weighing the corresponding income statement items In each chapter not only are the accounting requirements presented but the requirements for audit measures based on the respective Standards on Auditing are highlighted and explained in detail The book places the requirements for reporting in the context of the Wirecard case and will be of interest to accountants auditors market regulators and credit risk analysts alongside students of accounting auditing

**The influence of clients on the social identities within the audit profession** Johanna Sylvander, 2020-03-02 The overall purpose of the thesis is to explore the meaning of professionalism and independence for the individuals within the audit arena Professionalism is defined as the occupational values that guide auditors professional behaviour and how independence is understood is assumed to be influenced by the social groups the auditors identify with The audit arena consists of several social actors i e the audit profession audit firms and auditors as well as external constituencies of the profession i e accountors and accountees The audit profession both serves the public interest by quality ensuring the information provided by the accountors to the accountees as well as conducts business in a state sanctioned monopoly like market Appearing independent and professional is therefore critical for the profession as independence and professionalism is the basis of society's trust in the profession and may particularly influence the profession's ability to recruit and retain staff The audit profession audit firms offices and audit teams are social groups which influence the values attitudes and behaviours of the auditors through the process of socialization into the profession and the audit firm However accountors i e clients and accountees i e stakeholders such as investors are also social actors who may influence the values attitudes and behaviour of auditors if auditors identify with these social actors Exploring the social identities at play within the audit arena enables us to more fully understand the values that guide professional work The thesis empirically investigates the social identity audit arena through potential current and former audit employees perceptions of the audit arena where the data is both qualitative interviews and quantitative surveys in nature The empirical material provides both pre socialized and post socialized perspectives on the

audit arena where the bulk of the material stems from the pre socialized perspective The thesis suggests that there are two types of auditors namely small client auditors and large client auditors where the small client auditor group dominates the audit arena The role of the small client auditor is described differently from the large public client auditor s role The small client auditor is perceived as a teacher who helps the clients run their businesses better and avoid problems with tax authorities et cetera making it necessary for the auditor to have a good and close relationship with the client in order to fulfil her his role The large client auditor is described more as having the traditional guardians of the market role Hence it seems as the small client auditor is guided by other values and has a different understanding of independence compared to the large client auditor However the large client auditor is also perceived as having a counselling teacher role indicating that some professional values are shared by small client and large client auditors These different roles auditors are perceived to have where independence and working for the public interest seem to mean different things can influence how new audit employees perceive the profession If employees expect to work as large client auditors but instead experience work being guided by small client auditor values or vice versa it may influence the willingness to stay in the profession These two roles are also a potential factor influencing the expectation gap i e the gap between what society thinks the auditor does and what s he does in practice These two roles may therefore influence society s image of the auditor and where the profession may have issues in appearing independent in the relationship with small clients
