**Romance and the Gentry in Late Medieval England** Michael Johnston,2014-06-19 Romance and the Gentry in Late Medieval England offers a new history of Middle English romance the most popular genre of secular literature in the English Middle Ages Michael Johnston argues that many of the romances composed in England from 1350 1500 arose in response to the specific socio economic concerns of the gentry the class of English landowners who lacked titles of nobility and hence occupied the lower rungs of the aristocracy The end of the fourteenth century in England witnessed power devolving to the gentry who became one of the dominant political and economic forces in provincial society As Johnston demonstrates this social change also affected England's literary culture particularly the composition and readership of romance Romance and the Gentry in Late Medieval England identifies a series of new topoi in Middle English that responded to the gentry's economic interests But beyond social history and literary criticism it also speaks to manuscript studies showing that most of the codices of the gentry romances were

produced by those in the immediate employ of the gentry By bringing together literary criticism and manuscript studies this book speaks to two scholarly communities often insulated from one another it invites manuscript scholars to pay closer attention to the cultural resonances of the texts within medieval codices simultaneously it encourages literary scholars to be more attentive to the cultural resonances of surviving medieval codices

### **Sir Gawain**

Thomas Hahn, 1995-07-01

This volume is the first affordable modern collection of all eleven of the known Middle English Gawain tales and aims to make these texts accessible to a wider contemporary audience. These poems, The Wedding of Sir Gawain and Dame Ragnelle, Sir Gawain and the Carle of Carlisle, The Awowyng of Arthur, The Awyntrs off Arthur, The Knightly Tale of Golofras and Gawain, The Greene Knight, The Turke and Sir Gawain, The Marriage of Sir Gawain, The Carle of Carlisle, The Jeaste of Sir Gawain and King Arthur, and King Cornwall are united by their common concern with the theme of

chivalry Sir Gawain was by far the most popular of Arthur's knights in medieval England and the verses collected here offer a window not only into English views on Gawain but also attitudes towards the knightly ideal and chivalry Incorporating glosses and introductions for each text as well as an extensive glossary this edition is excellent for students of Middle English romance    The Arthurian Encyclopedia Norris J.
