**The Art of the Long View (Summary)**

Peter Schwartz,2009 getAbstract Summary Get the key points from this book in less than 10 minutes Peter Schwartz evidences charming honesty and humility about his experiences building scenarios He learned from his failures so he includes them as well as his rather impressive successes Schwartz emphasizes that scenario planning is not the same thing as predicting the future and that complete accuracy is not the goal Yet it is still striking how accurately his 1991 scenarios played out He may have missed a few specific events and trends but if you d based your actions on his scenarios you would have been well equipped for the last two decades His very useful principles of scenario planning and multisource information gathering have not changed since he delineated them The result is a classic getAbstract recommends this book to entrepreneurs organizational decision makers and anyone interested in strategic planning futurism or change Book Publisher Copyright 1991 by Peter SchwartzPublished by arrangement with Currency Books Doubleday a division of Random House Inc

[AN ILLUSTRATED TREATISE ON THE ART OF SHOOTING](#) CHARLES LANCASTER,1891 **Energy to 2050** Maria Rosa Virdis,2003

Analysing the interaction between energy and climate change mitigation issues requires the adoption of a long term perspective looking up to fifty years ahead The future cannot be predicted particularly over longer periods However strategic planning and political decisions demand that we explore options for the future and these are best developed through

scenarios conjectures as to what might happen in the future based on our past and present experience of the world and on plausible speculation about how these trends may further evolve This volume looks at different types of scenarios evaluating how they can be used to analyse specific aspects of the interaction between energy and environment over the longer term It examines exploratory scenarios based on different expectations of technical and or policy developments over the next 50 years and normative scenarios based on a set of desirable features or norms that the future world should possess These long term scenarios complement the IEA's World Energy Outlook which presents a mid term business as usual scenario with some variants
