## **The Basis Of Potentization Research:**

*The Basis of Potentization Research* Theodor Schwenk, 1988      **The Tree of Life and the Holy Grail** Sylvia Francke, 2007 Recent works of fiction and popular history have promoted the idea that the Holy Grail symbolizes a physical bloodline that resulted from a union of Jesus Christ and Mary Magdalene. It is claimed by some that this is the secret kept tirelessly by certain esoteric movements for the past two millennia. Based on her groundbreaking research, Sylvia Francke exposes this notion as a blatant misinterpretation of the mystery traditions that preceded and ran parallel to the birth of Christianity. She traces the ancient spiritual paths of knowledge from the Cathars, the Knights Templar, and the enigmatic Rosicrucians to the work of Rudolf Steiner in the twentieth century. Here she concludes that true Grail knowledge, the Tree of Life, and the Holy Grail itself, explained in their metaphysical context, suggest a solution to the mystery of sudden wealth and the strange behavior of Brengel Saunière, the mysterious priest of Rennes-le-Château in southern France. True Grail knowledge, Francke concludes, has nothing to do with bloodlines or worldly status; rather, it is an ancient lifeline to the spiritual origins of creation. Its energetic forces radiate out from the Earth and in from the constellations and planets while interacting with human individuals. It represents the key to fulfilling humanity's quest and the next step in human evolution. The recent explosion of interest in revisionist Christianity history, the shadow Grail, prompted Sylvia Francke to revise *The Tree of Life and the Holy Grail*, first published in 1996. The result is a completely reworked and expanded book that offers a powerful and convincing refutation of distorted esoteric truths.

*The Scientific Basis of Medicine* Isaac Winter Heysinger, 1897      *Cosmos, Earth and Nutrition* Richard Thornton Smith, 2013-04-03 In recent years there has been an explosion of interest in organic and biodynamic produce. Although once marginal and alternative, escalating concerns about the environment, health, food quality, and animal welfare have brought organics into mainstream consciousness. Biodynamics, a unique development of the organic approach, does not narrowly focus on agricultural techniques. It was conceived as a new way of thinking about farming, nutrition, and the world of nature, allowing for a revitalized relationship with the living soil, the elemental world, and the cosmos. Originating from a series of eight lectures given by Dr. Rudolf Steiner in 1924, biodynamics broadens the outlook of agriculture and the science behind it, leading to a holistic perspective that incorporates astronomical rhythms and unique preparations for plants and earth. The author describes the foundations on which not only biodynamics but also the wider organic movement is based. He builds bridges between mainstream science and Steiner's insights, making it easier for the wider organic and ecological movement to approach biodynamic concepts and practise. This book has much to offer to the beginner as well as to those already involved with biodynamics. Its broad range of topics, including the ecology of the farm, organism, food quality, and nutrition, community-supported agriculture, planetary influences, seed quality, and the vitality of water, contribute to a deeper understanding of the subject. The author is also concerned to promote innovation so that biodynamics moves with the times. An appendix includes details for contacting various elements of the biodynamic world.

DR RICHARD THORNTON SMITH was formerly a geography professor at the University of Leeds specializing in soil science environment and conservation Widely travelled he has a long standing interest in indigenous and sustainable farming He was introduced to the work of Rudolf Steiner at an early age although his full involvement with biodynamics dates from 1990 when he began to participate in training programmes and workshops at Emerson College Sussex In 1996 he began a biodynamic extension programme in Sri Lanka for which he published a book most recently updated in 2007 Since 2001 he has been an inspector for the Biodynamic Association s Demeter and Organic Certification in the UK In 2003 he produced an edited selection of Steiner s work relating to agriculture He is currently a council member of the Biodynamic Agricultural Association and lives in Ross on Wye Herefordshire
