*Executive Thinking* Kevin Baize OD,Morris Graham PhD,2011-02-18 Life is about how much we think Thinking is about how much mental capacity we possess Capacity in addition to our abilities and conscientiousness is about how much we can process combinations of verbal height quantitative width and spatial depth with decisiveness direction and speed No matter where we go or what we do as executives we take our thinking with us That may spoil everything because to a great extent we do and accomplish what we think about Our thoughts mold our aspirations attitudes and accomplishments during our life In other words our careers and lives are influenced more by the power of our thoughts than anything else The bad news is that most of us never fully use our mental capacities and never achieve our potential The good news is that neural technologies are now available to transform our thinking into the higher realms of brilliance Developing the spatial capacity to think higher wider and deeper means breaking away from the effects of years of flat thinking or educational backgrounds that stifles creative innovative potential Expand your mental agility through a development of higher order processes and discover a whole new world mentally in Executive Thinking

Logic Without Gaps or Gluts Benjamin Alan Burgis,2022-02-25 This book offers a defense against non classical approaches to the paradoxes The author argues that despite appearances the paradoxes give no reason at all to reject classical logic In fact he believes classical solutions fare better than non classical ones with respect to key tests like Curry s Paradox a Liar like paradox that dialetheists are forced to solve in a way totally disjoint from their solution to the Liar Graham Priest s In Contradiction was the first major work that advocated the use of non classical approaches Since then these views have moved into the philosophical mainstream Much of this movement is fueled by a widespread sense that these logically heterodox solutions get to the real nub of the issue They lack the ad hoc feel of many other solutions to the paradoxes The author believes that it s long past time for a response to these attacks against classical orthodoxy He presents a non logically revisionary solution to the paradoxes This title offers a literal way of cashing out the disquotation metaphor While the details of the view are novel the idea has a pre history in the relevant literature The author examines objections in detail He rejects each in turn and concludes by comparing the virtues of his logically orthodox approach with those of the paraconsistent and paracomplete competition
