### Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating testing other "based with a test" which can be used to find or create improvements using evidence or ideas or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the part of a solution might face challenges, as it is important to weigh trade-offs carefully. For example, creating materials for a house that may affect its cost and ease of use, which influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises made helps others learn and possibly improve on the idea. Communication, sharing knowledge openly, and reflecting on the impacts of the innovation are essential steps. This process encourages sharing ideas, healthy challenges, responsible decision-making, and team communication.

#### 6. Mark the best answer for each question.

1. What is the first important step when applying science to solve a local problem?
- a. Designing a solution immediately
  - b. Relying on local experience and intuition
  - c. Ignoring safety concerns
  - d. Understanding the problem fully

2. What does documenting constraints in a solution help with?
- a. Reducing the problems of the solution
  - b. Documenting constraints like budget and safety
  - c. Showing how to solve the problem
  - d. Demonstrating that the solution has no flaws

3. Which is an example of a trade-off?
- a. Finding a solution without any constraints
  - b. Ignoring safety concerns
  - c. Weighing the pros and cons of different materials
  - d. Using unsafe materials

4. Why is it important to document a solution?
- a. To attract new users to the solution
  - b. To make others aware of the solution
  - c. To record the problem and solution
  - d. To avoid documenting the solution

#### 6. Mark if the statement is True (T) or False (F).

When making a solution, it is important to consider the trade-offs between different factors. For example, when designing a solution, it is important to consider the trade-offs between cost and safety. This means a solution that is cheap but unsafe is not a good solution.
