Department of Planning, Economic Development and Conservation,1981 **Mapping It Out** Mark Monmonier,2024-05-31  
Writers know only too well how long it can take and how awkward it can be to describe spatial relationships with words alone  
And while a map might not always be worth a thousand words a good one can help writers communicate an argument or  
explanation clearly succinctly and effectively In his acclaimed How to Lie with Maps Mark Monmonier showed how maps can  
distort facts In Mapping it Out Expository Cartography for the Humanities and Social Sciences he shows authors and  
scholars how they can use expository cartography the visual two dimensional organization of information to heighten the  
impact of their books and articles This concise practical book is an introduction to the fundamental principles of graphic logic  
and design from the basics of scale to the complex mapping of movement or change Monmonier helps writers and  
researchers decide when maps are most useful and what formats work best in a wide range of subject areas from literary  
criticism to sociology He demonstrates for example various techniques for representing changes and patterns different  
typefaces and how they can either clarify or confuse information and the effectiveness of less traditional map forms such as  
visibility base maps frame rectangle symbols and complementary scatterplot designs for conveying complex spatial  
relationships There is also a wealth of practical information on map compilation cartobibliographies copyright and  
permissions facsimile reproduction and the evaluation of source materials Appendixes discuss the benefits and limitations of  
electronic graphics and pen and ink drafting and how to work with a cartographic illustrator Clearly written and filled with  
real world examples Mapping it Out demystifies mapmaking for anyone writing in the humanities and social sciences A useful  
guide to a subject most people probably take too much for granted It shows how map makers translate abstract data into eye  
catching cartograms as they are called It combats cartographic illiteracy It fights cartophobia It may even teach you to find
