Probabilistic Indexing for Information Search and Retrieval in Large Collections of Handwritten Text Images

Alejandro Héctor Toselli, Joan Puigcerver, Enrique Vidal, 2024-04-10 This book provides a comprehensive presentation of a recently introduced framework named probabilistic indexing PrIx for searching text in large collections of document images and other related applications It fosters the development of new search engines for effective information retrieval from manuscripts which however lack the electronic text transcripts that would typically be required for such search and retrieval tasks The book is structured into 11 chapters and three appendices The first two chapters briefly outline the necessary fundamentals and state of the art in pattern recognition statistical decision theory and handwritten text recognition Chapter 3 presents approaches for indexing as opposed to spotting each region of a handwritten text image which is likely to contain a word Next Chapter 4 describes models adopted for handwritten text in images namely hidden Markov models convolutional and recurrent neural networks and language models and provides full details of weighted finite state transducer WFST concepts and methods needed in further chapters of the book Chapter 5 explains the set of techniques and algorithms developed to generate image probabilistic indexes which allow for fast search and retrieval of textual information in the indexed images Chapter 6 then presents experimental evaluations of the proposed framework and algorithms on different traditional benchmark datasets and compares them with other approaches while Chapter 7 reviews the most popular keyword spotting approaches Chapter 8 explains how PrIx can support classical free text search tools while Chapter 9 presents new methods that use PrIx not only for searching but also to deal with text analytics and other related natural language processing and information extraction tasks Chapter 10 shows how the proposed solutions can be used to effectively index very large collections of handwritten document images before Chapter 11 eventually summarizes the book and suggests promising lines of future research The appendices detail the necessary mathematical foundations for the work and presents details of the text image collections and datasets used in the experiments throughout the book This book is written for researchers and post graduate students in pattern recognition and information retrieval It will also be of interest to people in areas like history criminology or psychology who need technical support to evaluate understand or decode historical or contemporary handwritten text

A London Encyclopaedia, Or Universal Dictionary of Science, Art, Literature and Practical Mechanics Thomas Curtis, 1829

Word Virus William S. Burroughs, 2007-12-01 With the publication of *Naked Lunch* in 1959 William Burroughs abruptly brought international letters into the postmodern age Beginning with his very early writing including a chapter from his and Jack Kerouac's never before seen collaborative novel *Word Virus* follows the arc of Burroughs's remarkable career from his darkly hilarious routines to the experimental cut up novels to *Cities of the Red Night* and *The Cat Inside* Beautifully edited and complemented by James Grauerholz's illuminating biographical essays *Word Virus* charts Burroughs's major themes and places the work in the context of the life It is an

excellent tool for the scholar and a delight for the general reader Throughout a career that spanned half of the twentieth century William S Burroughs managed continually to be a visionary among writers When he died in 1997 the world of letters lost its most elegant outsider
