Learning Mathematics in Elementary and Middle Schools W. George Cathcart, 2001 Text is appropriate for courses in Mathematics for the Elementary School Built on the foundation of the new 2000 NCTM Principles and Standards this major new entry for K 8 math methods has impacted the market because of its point of use links to the standards and its emphasis on the importance of a child centered approach creating a learning environment that informs teachers how to support children as they build understandings of math concepts Designed to be neither skimpy nor exhaustive this text presents theory in an accessible manner and models a wealth of practical activities for teaching Five videos from the Annenberg CPB TEACHING MATH video series bring real classrooms to life for teachers and are integrated into the text as four color resourceful inserts

Beyond Classical Pedagogy Terry Wood, Barbara Scott Nelson, Janet E. Warfield, 2014-04-04 The emergence of the National Council of Teachers of Mathematics Standards in 1989 sparked a sea change in thinking about the nature and quality of mathematics instruction in U S schools Much is known about transmission forms of mathematics teaching and the influence of this teaching on students learning but there is still little knowledge about the alternative forms of instruction that have evolved from the recent widespread efforts to reform mathematics education Beyond Classical Pedagogy Teaching Elementary School Mathematics reports on the current state of knowledge about these new instructional practices which differ in significant ways from the traditional pedagogy that has permeated mathematics education in the past This book provides a research based view of the nature of facilitative teaching in its relatively mature form along with opposing views and critique of this form of pedagogy The focus is on elementary school mathematics classrooms where the majority of the reform based efforts have occurred and on the micro level of teaching classroom interaction as a source for revealing the complexity involved in teaching teachers learning and the impact of both on children s learning The work in elementary mathematics teaching is situated in the larger context of research on teaching Research and insights from three disciplinary perspectives are presented the psychological perspective centers on facilitative teaching as a process of teachers learning the mathematical perspective focuses on the nature of the mathematical knowledge teachers need in order to engage in this form of teaching the sociological perspective attends to the interactive process of meaning construction as teachers and students create intellectual communities in their classrooms The multidisciplinary perspectives presented provide the editors with the necessary triangulation to provide confirming evidence and rich detail about the nature of facilitative teaching Audiences for this book include scholars in mathematics education and teacher education teacher educators staff developers and classroom teachers It is also appropriate as a text for graduate courses in mathematics education teacher education elementary mathematics teaching methods and methods of research in
