Development Economics Shahrukh Rafi Khan, 2019-10-23 Following the 2007 2009 financial and economic crises there has been an unprecedented demand among economics students for an alternative approach which offers a historical institutional and multidisciplinary treatment of the discipline Economic development lends itself ideally to meet this demand yet most undergraduate textbooks do not reflect this This book will fill this gap presenting all the core material needed to teach development economics in a one semester course while also addressing the need for a new economics and offering flexibility to instructors Rather than taking the typical approach of organizing by topic the book uses theories and debates to guide its structure This will allow students to see different perspectives on key development questions and therefore to understand more fully the contested nature of many key areas of development economics The book can be used as a standalone textbook on development economics or to accompany a more traditional text **The New Development Economics**

Jomo K.S., Ben Fine, 2006 This volume provides a critique of the post Washington Consensus in neoliberal economics Development Economics Julie Schaffner, 2013-10-07 Development Economics Theory Empirical Research and

Policy Analysis by Julie Schaffner teaches students to think about development in a way that is disciplined by economic

theory informed by cutting edge empirical research and connected in a practical way to contemporary development efforts It lays out a framework for the study of developing economies that is built on microeconomic foundations and that highlights the importance in development studies of transaction and transportation costs risk information problems institutional rules and norms and insights from behavioral economics It then presents a systematic approach to policy analysis and applies the approach to policies from around the world in the areas of targeted transfers workfare agricultural markets infrastructure education agricultural technology microfinance and health International Handbook on Education Development in the Asia-Pacific Wing On Lee, Phillip Brown, A. Teaching Development Economics from a Gender Perspective Gunseli Berik, Yana van der Meulen Rodgers, 2022 An undergraduate course in development economics presents an ideal opportunity to introduce students to the importance of gender differences in economic outcomes This article argues that a systematic integration of gender into development economics courses based on standard textbooks is feasible and desirable We provide a gendered narrative of how to engender a development economics course using as examples topics that are commonly taught and we show how gender aware scholarly articles classroom activities and assignments can complement a course based on a standard textbook or set of articles We engender three main sections of a prototype development economics course meanings and measures of economic development strategies for economic development and salient issues in development and we add a forward looking section on creating equitable development China's Education Aid to Africa Wei Ye, 2023-05-31 China's rise as an aid provider in Africa has caught global attention with China's activity being viewed as the projection of soft power of a neo colonialist kind in an international relations context This book which focuses on China's education aid government scholarships training Confucius Institutes dispatched teachers etc reveals a much more complicated picture It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China's soft power projection

how much of China's aid is bound up with an education for economic growth outlook mirroring China's own recent experiences of economic development and how China's aid prioritized to reflect the commercial sector's interests is out of step with most international development aid which is dominated by education agendas and the campaigns of international organizations and traditional donors this leaves China easily exposed to the charge of neo colonialism This situation also reveals insufficient knowledge production of China and in South South Cooperation Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform

Perspectives on Labour Economics for Development Sandrine Cazes, Sher Verick, 2013 In developing countries labour markets play a central role in determining economic and social progress since employment status is one of the key determinants of exiting poverty and promoting inclusion Yet the reality in most developing countries is that the labour market fails to create the jobs in the formal economy that would help individuals and their families prosper In recognition of these challenges governments and other stakeholders in developing countries have increasingly prioritised policies and programmes to promote decent work However this requires navigating a range of complex issues and debates surrounding the linkages between development processes and labour market outcomes This volume consists of three main thematic parts Part I provides a broad overview of key issues including characterising the employment challenge in developing countries and the link between economic growth distribution poverty and employment Drawing on the literature and country examples Part II analyses the specific topics of wages migration and education The final section shifts to a more normative focus addressing labour market institutions and policies along with systematic approaches to quantifying labour markets in developing countries *Perspectives on Labour Economics for Development* is an invaluable reference for policy makers in middle and low income countries as well as an ideal handbook for teachers and students of economics and development

Education and National Development Ingemar Fägerlind, Lawrence J. Saha, 1983 In this second edition the authors have completely updated expanded the original volume to produce a timely important treatment of the relationship between education national development A new chapter on women education development directs attention to a dimension of development which until recently has been largely neglected
