**Team Performance in Health Care** Gloria D. Heinemann, Antonette M. Zeiss, 2012-12-06 The idea of teamwork in health care emerged at several times during the 20th century as the result of shifts in the nature and demands of health care and societal needs Examples include medical and surgical teams serving the military

in World War II primary care teams staffing Community Health Centers created by President Johnson's War On Poverty and geriatric care teams established to serve the rapidly growing number of aging citizens Collaborative teamwork surfaced as a rational solution to health care needs but political and economic consensus to support widespread implementation was lacking The increasing complexity of providing health care seemed best served by the skills and efforts of interdisciplinary teams but such care was viewed as expensive so evaluation of its effectiveness became essential There were major problems in conducting such evaluation however First no clear theory guided the concept and practice of teamwork Early attempts to employ theoretical constructs explaining the behavioral and organizational phenomena of teamwork borrowed from theories of group dynamics communication organizational development and general systems Further few reliable validated instruments existed to evaluate team process function or effectiveness The best early efforts at research and evaluation came from academic centers funded by the Office of Interdisciplinary Programs of the Bureau of Health Professions 1975-78 and from the Veterans Affairs Interprofessional Team Training Development Program

**The Winning Trainer** Julius E. Eittington, 2002 Tips and practical exercises to help trainers develop more participative training sessions *group dynamics & team building*, Team Building Maysan Shalhoub, 2014-11-15 Team building is a philosophy of job design in which employees are viewed as members of interdependent teams instead of as individual workers Team building which is correctly spelled with two words citation needed refers to a wide range of activities presented to businesses schools sports teams religious or nonprofit organizations designed for improving team performance According to Dyer in 2007 team building was originally a group process intervention aimed at improving interpersonal relations and social interactions and has developed to include achieving results meeting goals and accomplishing tasks Team building is pursued via a variety of practices and can range from simple bonding exercises to complex simulations and multi day team building retreats designed to develop a team including group assessment and group dynamic games usually falling somewhere in between It generally sits within the theory and practice of organizational development but can also be applied to sports teams school groups and other contexts Team building is not to be confused with team recreation that consists of activities for teams that are strictly recreational Team building can also be seen in day to day operations of an organization and team dynamic can be improved through successful leadership Team building is said to have benefits of self development positive communication leadership skills and the ability to work closely together as a team to solve problems Team building focuses on four methods that effect the unit role clarification interpersonal relationship management goal setting and problem solving Work environments tend to focus on individuals and personal goals with reward recognition singling out the achievements of individual employees Team building can also refer to the process of selecting or creating a new team
