The Pall Mall Magazine Lord Frederick Spencer Hamilton,Sidney Daryl,George Roland Halkett,Charles Robert Morley,1896 **Seeing Nature Through Gender** Virginia Scharff,2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet

Comparative Labour Law Principles and Methods Industrial Relations Inindustrialized Market Economies

Greg Bamber,2001-06-22 Comparativism is no longer a purely academic exercise but has increasingly become an urgent necessity for industrial relations and legal practitioners due To The globalisation of the economy The massive introduction of new information technology The growth of multinational enterprises And The impact of international and regional organizations aspiring to harmonize rules the growing need for comprehensive up to date and readily available information on labour law and industrial relations in different countries led To The publication of the International Encyclopaedia for Labour Law and Industrial Relations In which almost 70 international and national monographs have been published thus far This book goes a step further than the Encyclopaedia inasmuch as most of the chapters provide comparative and integrated thematic treatment Our aim is to describe the salient characteristics and trends in labour law and industrial relations in the contemporary world Encouraged by the warm reception of the first six editions we hope that also the seventh edition will serve as a textbook and reference work to facilitate the task of teachers and students of comparative labour law and industrial relations We hope too that the book will provide labour lawyers HRM and industrial relations specialists with the necessary insights to cope with a world which is increasingly international **ASQC ...
