Osif, 2011-08-09. With the encroachment of the Internet into nearly all aspects of work and life, it seems as though information is everywhere. However, there is information and then there is correct, appropriate, and timely information. While we might love being able to turn to Wikipedia for encyclopedia-like information or search Google for the thousands of links on a topic, engineers need the best information—information that is evaluated, up to date, and complete. Accurate, vetted information is necessary when building new skyscrapers or developing new prosthetics for returning military veterans. While the award-winning first edition of *Using the Engineering Literature* used a roadmap analogy, we now need a three-dimensional analysis reflecting the complex and dynamic nature of research in the information age. *Using the Engineering Literature, Second Edition* provides a guide to the wide range of resources available in all fields of engineering. This second edition has been thoroughly revised and features new sections on nanotechnology as well as green engineering. The information age has greatly impacted the way engineers find information. Engineers have an effect, directly and indirectly, on almost all aspects of our lives and it is vital that they find the right information at the right time to create better products and processes. Comprehensive and up to date with expert chapter authors, this book fills a gap in the literature, providing critical information in a user friendly format. **Handbook of Technical Writing, Tenth Edition** Gerald J. Alred, Charles T. Brusaw, Walter E. Oliu, 2012. Combining guidance for writing over 40 types of professional documents with thorough coverage of grammar, usage, and style, the *Handbook of Technical Writing* functions as both a writer's handbook and a complete guide to technical communication. It provides quick access to hundreds of topics and scores of sample documents and visuals. Publisher's note. ***Marketing Yourself with Technical Writing*** William M. Vatavuk, 1992-07-21. *Marketing Yourself with Technical Writing: A Guide for Today's Professionals* provides valuable guidance on how to get your technical writing published. The author discusses such important topics as book contracts, book indexes, the peer review process, writing query letters, and dealing with editors. Current listings of a representative sample of technical publishers and periodicals are presented, with each listing containing identifying data, e.g., name, address, phone, editor, key statistics, e.g., circulation, titles published, submissions, submission specifications, contents, and terms offered. The book also discusses the business aspects of technical writing and addresses such issues as taxes, copyright, and libel. The book's final chapter features suggestions and opinions from six successful writers, editors, and publishers. *Marketing Yourself with Technical Writing: A Guide for Today's Professionals* is a valuable resource for anyone looking to succeed in the field of technical writing.
