Innovative tools and design strategies. The case of Eclectic Architecture in Buenos Aires Garrido, Federico Andrés, 2023-05-26 The research deals with a question about Architecture and its design strategies combining historical information and digital tools Design strategies are historically defined they rely on geometry context building technologies and other factors The study of Architecture's own history particularly in the verge of technological advancements like the introduction of new materials or tools may shed some light on how to internalize digital tools like parametric design and digital fabrication **The Feature-Driven Method for Structural Optimization** Weihong Zhang, Ying Zhou, 2020-11-05 The Feature Driven Method for Structural Optimization details a novel structural optimization method within a CAD framework integrating structural optimization and feature based design The book presents cutting edge research on

advanced structures and introduces the feature driven structural optimization method by regarding engineering features as basic design primitives Consequently it presents a method that allows structural optimization and feature design to be done simultaneously so that feature attributes are preserved throughout the design process The book illustrates and supports the effectiveness of the method described showing potential applications through numerical modeling techniques and programming This volume presents a high performance optimization method adapted to engineering structures a novel perspective that will help engineers in the computation modeling and design of advanced structures Integrates two independent methods structural optimization and feature based design into one framework Adapts the high performance optimization method to the practice of designing engineering structures Provides numerical evidence for the effectiveness and potential of the methods described Works within a computer aided design framework to develop a novel structural optimization methodology Presents engineering features as the basic design primitives in structural optimization *Robotic Fabrication in Architecture, Art and Design 2016* Dagmar Reinhardt, Rob Saunders, Jane Burry, 2016-02-03 The book presents the proceedings of Rob Arch 2016 the third international conference on robotic fabrication in architecture art and design The work contains a wide range of contemporary topics from methodologies for incorporating dynamic material feedback into existing fabrication processes to novel interfaces for robotic programming to new processes for large scale automated construction The latent argument behind this research is that the term file to factory must not be a reductive celebration of expediency but instead a perpetual challenge to increase the quality of feedback between design matter and making
