The author argues that this offers greater feedback during surgery, a shorter recovery period and absence of scarring. The book includes a full explanation of preoperative preparation including evaluation of the nasal surface aesthetics using the concept of geometric polygons as aesthetic subunits to define both the existing deformity and the aesthetic goals. Aided by a wealth of color photos it also provides step by step descriptions of the surgical techniques developed and modified to achieve the desired surface appearance and illustrates how the novel dissection and redrape control methods reduce the healing time and enhance outcomes. Further the book presents a series of case analyses documenting the benefits of the approach. Written in a cookbook style this superbly illustrated book enables plastic surgeons to quickly learn how to utilize the closed approach to rhinoplasty for optimal aesthetic benefit.

*Minimally Invasive Techniques in Rhinoplasty* Nikolay Serdev, 2016-03-09 This book is divided into two parts. The first part describes mini invasive surgical techniques sufficient to perform the most important tasks in rhinoplasty such as tip rotation and projection, closure of the open roof after humpectomy, alignment and stabilization of the columella, refinement of the nasal tip, lower third and medial third, narrowing of the alar base. The second part concerns medical rhinoplasty techniques using nerve blocks, injectable fillers etc which aim is to achieve similar results despite their temporary effect. Currently the request for such procedures and their number exceeds this of surgical operations and demonstrates their importance. Although minimally invasive techniques will not totally replace surgical rhinoplasty this book will serve as a tool to enhance refinement of rhinoplasty and clinical aesthetics. This first textbook in minimally invasive rhinoplasty techniques will be of great help to many doctors and will provoke further development of time saving, atraumatic and mini invasive techniques with preservative attitude toward nasal tissues in the modern art of nasal and face beautification.
