## **The Beano School File:**

*Beano School File* Kingfisher Publications, plc, 1999-07    *Global Citizenship Education*, 2008-01-01 The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities. As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates unequal power relations or cause new inequalities. The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic, tribal and nationalist rivalries problems of increasing international migration and asylum, growing regional imbalances and increasing world inequalities. Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government. Many of the contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism. One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision. Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order where the rights of the individual and of cultural groups irrespective of race, gender, ethnicity or creed are observed, preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be tempted to call global civil society.    Technology, Innovation, Entrepreneurship and Education David Crawford, Jeremy Foss, Nicholas Lambert, Martin Reed, Jennah Kriebel, 2024-06-28 This book constitutes the refereed proceedings of the 4th International Conference on Technology Innovation Entrepreneurship and Education (TIE 2023) held in Cambridge, UK in September 2023. The 17 full papers were carefully selected from 44 submissions and cover four areas: international school projects, technology in education, technology for content creation and future content delivery.    Pupil Management and Emerging Democratic Voices Andrew Thomas, 2025-08-18 This book addresses the distance between contemporary philosophical critiques of education and the classroom context by applying new insights from social philosophy, neurology and historical analysis to common school practices. Critiquing contemporary academic and political debates concerning the use and misuse of assessment tools, psychometric testing and classroom management on pupils, this book looks in detail at the consequences of such practices for pupil management and the nurturing of their emerging democratic voices and sense of independence. This book explores these practices in the context of broader social phenomena such as the state of exception, management for legibility, self regulation, governmentality and epidemiology. Chapters link critical and philosophical

considerations about politics administration and the brain to real world classroom realities and everyday educational activities forming an important contribution to the wider discourse on learning and inclusion in contemporary school systems Bringing philosophical and historical insights to bear on the concrete practices of educational life this book will be of interest to scholars researchers and postgraduate students in the field of philosophy of education as well as schooling classroom practice and pedagogy and didactics more broadly

Measor,Peter Woods,2019-12-09 Changing schools at 11 or 12 is a critical often traumatic event in a pupil s career Earlier studies had looked at this transitional stage from the schools point of view in the light of institutional aims and objectives Originally published in 1984 this richly detailed and readable study looks at it from the pupils point of view it illustrates their perceptions of the transfer their anxieties and their experiences The book is the result of a research project in which children transferring from a typical middle school to a typical comprehensive in a Midlands town were observed over a period of eighteen months The authors reveal various ways in which children adjust to a large more complex school organisation to new forms of discipline and authority and new demands in school work They emphasise the significance of teenage culture during this period and identify an important area of interplay between school culture and sub culture They pay special attention to gender identities and the ways in which these affect pupils responses to different subjects in the curriculum Finally they consider the theoretical and policy implications of their survey and make positive recommendations for improving school and classroom practice at both primary and secondary level
