The Better Class:

The Great Class War 1914-1918 Jacques R. Pauwels, 2016-04-06 Historian Jacques Pauwels applies a critical revisionist lens to the First World War offering readers a fresh interpretation that challenges mainstream thinking As Pauwels sees it war offered benefits to everyone across class and national borders For European statesmen a large scale war could give their countries new colonial territories important to growing capitalist economies For the wealthy and ruling classes war served as an antidote to social revolution encouraging workers to exchange socialism s focus on international solidarity for nationalism s intense militarism And for the working classes themselves war provided an outlet for years of systemic militarization quite simply they were hardwired to pick up arms and to do so eagerly To Pauwels the assassination of Archduke Franz Ferdinand in June 1914 traditionally upheld by historians as the spark that lit the powder keg was not a sufficient cause for war but rather a pretext seized upon by European powers to unleash the kind of war they had desired But what Europe s elite did not expect or predict was some of the war s outcomes social revolution and Communist Party rule in Russia plus a wave of political and social democratic reforms in Western Europe that would have far reaching consequences Reflecting his broad research in the voluminous recent literature about the First World War by historians in the leading countries involved in the conflict Jacques Pauwels has produced an account that challenges readers to rethink their understanding of this key event of twentieth century world history

The Great Class Shift Thibault Muzergues, 2019-11-05 This thought provoking book offers a new global approach to understand how four social class structures have rocked our political systems to the extent that no politician or political party can exist today without claiming to be speaking on their behalf and no politician can hope to win an electoral majority without building a coalition among these classes Based on a four fold analysis Urban and Liberal Creatives Suburban Middle Class White Working Class and the Millennials this book shows that while many have focused on a supply side vision of politics to explain the upheavals in our political party systems a vision centred on demand and the Weberian take on political parties as vehicles for class interests is more compelling In 2016 our political world was changed forever by the victories of Brexit in the UK and Donald Trump in the USA Far from being confined to the Anglosphere however changes have also rocked the political landscapes in Europe As the crisis of 2008 has shaken the foundations of Western societies shrinking the size of the previously all powerful middle class new classes have emerged and with them a new political demand that new or old parties have tried to satisfy This book will be of key interest to political practitioners politicians advisors consultants journalists political pundits party builders and government officials and more broadly to academics students and readers of European and Western politics political sociology party politics and political parties and electoral demographics
