monitor lizards beginning with detailed species accounts and proceeding to various modern comparative analyses. Where possible people who have had detailed field experience with a particular species have assembled the species accounts. In the process of reporting what is known the book also identifies what remains to be learned about these lizards. This volume stands as a model for showing how such a diverse monophyletic group can be exploited both to identify and to understand the actual course of evolution.

**Savannah and Grassland Monitors** Robert George Sprackland, 2012-10-09 Monitors are among the most popular lizards kept in captivity and this colorful guide provides information on the two most commonly seen species savannah monitors and grassland monitors. Due to the intelligence and relative easy care needs of these lizards they are favored by beginning herpetoculturists though great emphasis must be placed on responsible ownership of these beautiful but delicate animals. Savannah Grassland Monitors written by lizard expert Robert George Sprackland PhD provides guidelines for keepers who wish to add a monitor to their vivarium. The chapter called Taxonomy gives an excellent summary of monitor species including the African species of which the savannah or Bosc's monitor and white throat monitor are examples and the Asian species including the Komodo dragon and the Argus Bengal Indian and gold monitors. This Advanced Vivarium Systems title includes information about selecting a healthy example of the selected species, quarantine and acclimation considerations, handling, housing needs, water and feeding as well as solid advice about keeping monitors healthy and thriving. A separate chapter on diseases and disorders provides a complete primer on the health needs and veterinary care of these rewarding reptiles.

Environmental Science A Research Perspective is a compilation of authors original research papers, scientific articles, review articles, popular articles, general articles and short notes on forest ecology, wetland ecology, plant ecology, bird ecology and animal ecology. The book is a perfect amalgamation of burgeoning and thrust topics spanning biodiversity and conservation and management of floral and faunal elements including ecology and biodiversity of phytoplankton, zooplankton, aquatic macrophytes, mangroves, terrestrial plants, animals, butterflies, reptiles, mammals and birds. It covers ecological and environmental factors affecting abiotic and biotic components prevailed in forest, desert, grassland and wetland habitats and ecosystems. The present book highlights field studies and laboratory investigations carried out by the authors during their research journey of 22 years (1998-2020). It discusses phenology, ethnobotanical, ethnomedicinal and aesthetic values of plants, resource use patterns by local inhabitants, socio cultural aspects, livelihood dependency, rare and endangered plants, animals and birds, anthropogenic pressures, conservation and management strategies of endemic, exotic and invasive species and so on. The book covers unique and promising research topics e.g. hydrochemistry, geochemistry, biomonitoring of heavy metals in aquatic and terrestrial plants, metal remediation, environmental modeling, environmental archaeology, environmental bioindicators, environmental forensics etc. The authors believe that this book is a perfect blend of their research work on two
