## **The Lime Pit:**

***The Lime Pit*** Jonathan Valin, 1980      ***The Streets of Louth: An A-Z History*** Caitlin Green, 2014 The Streets of Louth offers an A-Z history of virtually every road within the town from ancient streets such as Upgate and Mercer Row through to modern residential developments such as Anthony Crescent. Designed for the general reader and anyone who has ever wondered how the streets of Louth have changed and developed over time, it not only looks at the archaeology, buildings and businesses of each of the individual streets but also the people who used to live on them from brewers and fish fryers through to jewellers and prostitutes. The book also makes use of local court reports from the nineteenth century to bring the Victorian history of the streets of Louth alive with crimes and accidents recorded that range from the mundane to the truly shocking.

***The Principles of Leather Manufacture*** H. R. Procter, 2017-09-06 This vintage book contains a comprehensive treatise on the manufacture of leather with details on deliming, depilation, the chemical qualities of skins and hides, puering, bathing, drenching and much more. Although old, much of the information contained within this book is timeless and will be of considerable utility to the modern reader with an interest in tanning. Contents include: Introductory Sketch of Leather Manufacture, The Living Cell, Putrefaction and Fermentation, Antiseptics and Disinfectants, The Origin and Curing of Hides and Skins, Structure and Growth of Skin, The Chemical Constituents of Skin, The Physical Chemistry of the Hide Fibre, et cetera. Many vintage books such as this are increasingly scarce and expensive. We are republishing this volume now in an affordable modern edition complete with a specially commissioned new introduction. First published in 1903.

***Seismic Resistance of Vernacular Timber Frames with Infills*** Andreea Dutu, Yoshihiro Yamazaki, 2024-03-28 This book provides an engineer's perspective on the traditional construction methods for timber frames with infills, focusing on traditional *paianita* houses in Romania and *minka* houses in Japan to provide insights into the construction, seismic behavior and design considerations of such structures. The nuances of each country's traditional construction methods are considered as well as the shared seismic culture and the similar functionality and local materials used for the houses plus challenges from earthquake loading and fire. The efforts to preserve traditional houses in Romania are contrasted with Japan's regulatory framework for traditional residential construction methods. Strengthening solutions are also proposed for timberframed houses with infills, considering various causes of degradation. Introduces examples from non-seismic and seismic-prone countries. Provides a comparative analysis of worldwide examples. Presents design examples illustrating the integration of traditional architecture with modern design standards. The book serves as a comprehensive guide to the engineering intricacies of traditional houses in Romania and Japan for engineers and architects with practical applications.
