the work of aesthetic form by arguing that pragmatist aesthetics needs a more complex conception of form Establishing a transatlantic theoretical dialogue Humanism Anti Authoritarianism and Literary Aesthetics brings together literary and aesthetic theory philosophy and intellectual history It discusses a broad range of authors from Emerson Whitman James Nietzsche Proust and Dewey to Wittgenstein Luk cs Adorno Jameson Latour and Rorty to illuminate how humanism pragmatism and anti authoritarianism are interlinked

**From Rechtsstaat to Universal Law-State** Åke Frändberg, 2014-07-03 In this book the author investigates what is common to the German idea of the Rechtsstaat and the Anglo American idea of the Rule of Law He argues that although dressed up in rather different garb these two concepts are in fact based on the same fundamental idea and stand for the same values the law state values all ideas that are in the European tradition older than their British and German variants The fundamental idea is that the individual shall enjoy legal protection against infringements brought about by the exercise of power on the part of the state In the book basic concepts such as legality legal equality legal certainty legal accessibility and legal security are investigated Also explored are their mutual relations in particular conflicts between them Furthermore the book offers practical advice on realising and sustaining these values in practice Finally it is argued that the characteristic law state values can only be justified by reference to an even more fundamental humanistic idea namely what the author calls a life of human dignity
