## **Teaching Hispanic Children:**

**Class, Race, and Gender in American Education** Lois Weis, 1988-07-08 Most educators might agree that the hidden agendas on class race and gender to a large extent condition and determine the form and the content of schooling. But how much of this situation is due to school factors and how much to social background factors is heatedly discussed and debated by scholars working within both the mainstream and critical traditions in the field of education. *Class Race and Gender in American Education* represents a groundbreaking overview of current issues and contemporary approaches involved in the areas of class race and gender in American education. In this book the first to combine a consideration of these issues and to investigate the manner in which they connect in the school experience authors consider the particular situations of males and females of divergent racial and class backgrounds from their earliest childhood experiences through the adult university years. While providing valuable original in depth ethnographic and statistical analyses the volume also incorporates some of the important current theoretical debates the debate between structuralists and culturalists is highlighted for example.

Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies, 1998     Resources in Education, 1990     **Teaching Hispanic Children** Toni Griego Jones, Mary Lou Fuller, 2003 Griego Jones and Fuller present information about the role of national origins and cultural backgrounds in teaching and learning and why it is important for teachers to know about culture in general and about Hispanic cultural groups in particular. The history and background on culture is intended to provide knowledge and a deeper understanding of the lives of Hispanic children in the United States and to help teachers and prospective teachers expand their professional perspectives. In writing about classroom practice and how to work with family and parents the authors have tried to directly address points identified in educational literature as effective practices for Hispanic children. There is a need for educators to understand their own thinking about Hispanic populations to reflect on their knowledge attitudes and beliefs about populations that have long been part of the American landscape but are now becoming a more visible part of it. The theme of reflection is carried out throughout each chapter with questions that will guide the reader to reflect on the content of the chapter and on the implications for themselves as professional educators. Provides an overview and demographic breakdown of the Hispanic population including national origin time in this country geographical region income level and age. A theme of reflection is carried throughout with reflection exercises at the end of each chapter. Through various activities preservice and inservice teachers are encouraged to begin developing their own methods and approaches to connecting with Hispanic students.
