## **Teaching Science Through Discovery:**

**Teaching Science Through Discovery** Arthur A. Carin, 1997 Showing teachers how a guided discovery approach to teaching science can ignite children's interest this text offers activities to stimulate a child's natural curiosity and guided questioning techniques to elicit insights and personal discovery. The work provides resource information on planning, organizing and running a guided discovery science programme in pre school, junior and secondary school settings. It suggests ways of integrating science teaching into oral and written language, social studies, art, mathematics, music and physical education.

**Teaching Science Through Discovery** Arthur A. Carin, Robert B. Sund, 1975

**Teaching Science to Every Child** John Settlage, Sherry Southerland, 2012-04-23

Providing timely and practical guidance about teaching science to all students this text gives particular emphasis to making science accessible to populations who are typically pushed to the fringe especially students of color and English language learners. Central to this text is the idea that science can be viewed as a culture including specific methods of thinking, particular ways of communicating and specialized kinds of tools. By using culture as a starting point and connecting it to effective instructional approaches this text gives elementary and middle school science teachers a valuable framework to support the science learning of every student. Changes in the Second Edition Three new chapters technological tools and resources embedded throughout each chapter increased attention to the role of theory as it relates to science teaching and learning expanded use of science process skills updated and expanded Companion Website [www.routledge.com/textbooks/9780415892582](http://www.routledge.com/textbooks/9780415892582)

**The Art of Teaching Science** Jack Hassard, 2005 This is a core teaching textbook designed for the professional development of middle and high school science teachers. Differing from other texts in its constructivist approach to learning and teaching it provides meaningful learning experiences and connections with the most recent research and understanding of science teaching. Each chapter is organized into two sections the first focuses on the content of the major theme of the chapter while the second consists of a newspaper like feature called The Science Teaching Gazette containing a variety of strategies for extending the learning process. Packed with learning tools hands on inquiry activities, case studies, think pieces and interviews with teachers around the world this is a remarkably comprehensive textbook designed to prepare a new cadre of science teachers Midwest.
