A summary of TEACHING CHILDREN LOVE and
TEACHING CHILDREN RESPONSIBILITY

Teaching Children Sensitivity

J Spring

Teaching Children Sensitivity:

Handbook of Psychology, Educational Psychology Irving B. Weiner, William M. Reynolds, Gloria E. Miller, 2012-10-16
Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do. This award-winning twelve-volume reference covers every aspect of the ever-fascinating discipline of psychology and represents the most current knowledge in the field. This ten-year revision now covers discoveries based in neuroscience, clinical psychology's new interest in evidence-based practice and mindfulness, and new findings in social, developmental, and forensic psychology.

Student-Teacher Relationship Quality Research: Past, Present and Future Matteo Angelo Fabris, Karine Verschueren, Debora Roorda, Claudio Longobardi, 2022-11-24
Interactions in Early Childhood Education

Alexandra C. Gunn, Claudia A. Hruska, 2017-07-18
This book provides new insights into how interactions in early childhood education are being studied and into what these studies' findings mean for improving the quality of early childhood education. The editors examine the methods, ethics, practices, and questions arising from such close work with children, families, and educators and have brought together a collection that highlights interactions research and practical implications for early childhood education and research with the ultimate aim of shaping quality practices. Starting with an overview of interaction research and its pedagogical value in early childhood education, the book subsequently introduces new interaction studies in early childhood from Europe and Australasia. Drawing from a range of perspectives and using different conceptual and methodological tools, the contributors use their interactions research to comment collectively on process quality in early childhood education and its relationship to the phenomenon of pedagogical interactions. The work as a whole bridges the gap between practice and research by addressing quality interactions for early learning for practitioners and providing researchers valuable information on methods for studying interactions within the everyday contexts of early childhood education.

Education and Development in Early Years From Cultural-historical Theory Aleksander Veraksa, Yulia Solovieva, Gustavo Cunha de Araujo, 2024-02-21
Cultural-historical theory addresses issues of child development through acquisition of cultural experience as a process of complex cultural activity and thus makes an emphasis on educational process as structured way of learning. Research issues that are raised starting from works of Vygotsky and his followers are connected with educational environment, instruction possibilities, and effectiveness relations of play and education, cognition and emotion in educational process, etc. For the past 40 years, special attention in terms of practical application was devoted to elaboration of methods that are used for measuring effectiveness of educational environment, for example CLASS, ECERS, structural changes in consciousness of a child, for example executive functions research, research of organization of play activity and development of symbolic function.

Teaching Children Sensitivity Linda Eyre, Richard Eyre, 1987-12-12
Offers parents advice on how to teach their pre-teen or teenage children how to become less self-centered and more able to

feel for and help each other *Children's Success in School* Joan M. Lakebrink,1983 **Teaching Your Children**
