The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school

regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates *Educating All Students in the Mainstream of Regular Education* Susan Bray Stainback,William C. Stainback,Marsha Forest,1989 This book builds from a historical overview of educational integration and explores the rationale behind the movement toward a merger of regular and special education Noted authorities advance this argument in well structured chapters organized around key themes including educational equality in practice strategies to promote merger educational practices to meet diverse student needs and family and community support Case histories and boxed statements highlighting pertinent points are among the effective instructional aides in this textbook A thought provoking question and answer format also confronts 22 of the most commonly addressed concerns about merging regular and special education *Behavioral Science Frontiers in Education* Eli Michael Bower,William G.
