Forthcoming Books Rose Army, 1992 *Unit X* Raj M. Shah, Christopher Kirchhoff, 2025-06-24 Shortlisted for the 2024 Financial Times Business Book of the Year An exceedingly important book General David Petraeus US Army Ret former Director of the CIA Essential reading for understanding how technology will change the future of warfare Chris Miller New York Times bestselling author of *Chip War* Inspiring A riveting reminder of how hard protecting our nation's security can be A must read Walter Isaacson New York Times bestselling author *Steve Jobs* and *Elon Musk* A compelling inside look at an elite unit within the Pentagon the Defense Innovation Unit also known as Unit X whose mission is to bring Silicon Valley's cutting edge technology to America's military

from the two men who launched the unit A vast and largely unseen transformation of how war is fought as profound as the invention of gunpowder or advent of the nuclear age is occurring Flying cars that can land like helicopters artificial intelligence powered drones that can fly into buildings and map their interiors microsatellites that can see through clouds and monitor rogue missile sites all these and more are becoming part of America's DIU fast tracked arsenal Until recently the Pentagon was known for its uncomfortable relationship with Silicon Valley and for slow moving processes that put the brakes on innovation Unit X was specifically designed as a bridge to Valley technologists that would accelerate bringing state of the art software and hardware to the battle space Given authority to cut through red tape and function almost as a venture capital firm Shah Kirchhoff and others in the Unit who came after were tasked particularly with meeting immediate military needs with technology from Valley startups rather than from so called primes behemoth companies like Lockheed Raytheon and Boeing Taking us inside AI labs drone workshops and battle command centers and also overseas to Ukraine's frontlines Shah and Kirchhoff paint a fascinating picture of what it takes to stay dominant in a fast changing and often precarious geopolitical landscape In an era when America's chief rival China has ordered that all commercial firms within its borders make their research and technology available for military exploitation strengthening the relationship between Washington and Silicon Valley was always advisable Today it is an urgent necessity
