## **Technical Literature:**

**Scientific and Technical Translation Explained** Jody Byrne, 2014-04-08 From microbiology to nuclear physics and chemistry to software engineering scientific and technical translation is a complex activity that involves communicating specialized information on a variety of subjects across multiple languages. It requires expert linguistic knowledge and writing skills combined with the ability to research and understand complex concepts and present them to a range of different audiences. Using a combination of interdisciplinary research real world examples drawn from professional practice and numerous learning activities this introductory textbook equips the student with the knowledge and skills needed to get started in this exciting and challenging field. It examines the origins and history of scientific and technical translation and the people tools and processes involved in translating scientific and technical texts.

**Scientific and Technical Translation Explained** provides an overview of the main features of scientific and technical discourse as well as the different types of documents produced. A series of detailed case studies highlight various translation challenges and introduce a range of strategies for dealing with them. A variety of resources and exercises are included to make learning effective and enjoyable. Additional resources and activities are available on Facebook.

**Controlling Language in Industry** Stephen Crabbe, 2017-01-30 This book provides an in depth study of controlled languages used in technical documents from both a theoretical and practical perspective. It first explores the history of controlled languages employed by the manufacturing industry to shape and constrain the information in technical documents. The author then offers a comparative analysis of existing controlled languages and distills the best practice features of those language systems. He concludes by offering innovative models that can be used to develop and trial a new controlled language. This book will be of interest to linguists working in technical and professional communication as well as writers and practitioners involved in the production of technical documents for companies in multiple industries and geographical locations.
