### **The I-Learning Revolution**

Bradley Lightbody, 2012. This book highlights how the online information explosion can and will transform teaching and learning to the advantage of all. Explore the concept of Flipped Learning to extend learning time beyond the classroom and to personalise and develop a 24/7 learning culture to meet the learning needs of the rising Generation Z. Our learning future is exploring questioning and creating rather than listening, watching and copying as the independent or ilearning revolution gains pace.

*Learning for a Living?* Karen Evans, 2003. The political consensus on lifelong learning that marked the end of the twentieth century fundamentally reshaped discourses on the role of lifelong learning. In a knowledge driven economy in which work is the new consumption we are engaged in a lifelong competition for livelihoods learning for the living. The lecture argues first that a learning revolution that reinforces inequalities and increases the gap between the powerful and the powerless is not a revolution that popular beliefs in meritocracy and the openness of opportunities to all could evaporate very quickly as it becomes apparent that the qualifications chase eventually becomes a zero sum game for all but the most advantaged. Finally re establishing the relationship between education and real life will mean linking learning for a living to wider social purposes. Demands that people should take more control of their lives have to be matched with expanded social entitlements as a minimum condition for a learning revolution worthy of the name.
