Sustainable Waste Management Challenges in Developing Countries Pariatamby, Agamuthu, Shahul Hamid, Fauziah, Bhatti, Mehran, Sanam, 2019-10-18 As global waste generation increases at a rapid rate there is a dire need for waste management practices such as collection disposal and recycling to protect from environmental pollution. However, developing countries generate two to three times more waste than developed countries and are slower to integrate waste management standards. There is a need for studies that examine the waste generation and practices of countries that share similar economic backgrounds as they strive to implement successful waste management techniques. Sustainable Waste Management Challenges in Developing Countries is an essential reference source that discusses the challenges and strategies of waste management practices and the unique waste issues faced by developing countries that prevent them from achieving the goal of integrated waste management. While highlighting topics including e-waste, transboundary movement and consumption patterns, this book is ideally designed for policymakers, legislators, waste company managers, environmentalists, students, academicians, and municipal planners seeking current research on the global waste management problem.

In Full Flight Walter Carlsnaes, Philip Nel, Institute for Global Dialogue, 2006 Foreign policy is widely regarded as one of the post-apartheid government's major areas of achievement, yet remains one of the most challenging. In this volume, leading scholars provide critical assessments of the conduct of South African foreign policy since 1994 against the background of six principles articulated by Nelson Mandela in a celebrated article published in the journal Foreign Affairs in 1993. While South African foreign policy has become wide ranging and complex, these reflective contributions demonstrate a remarkable adherence to these principles.
