## Story Of Some Prairie Inventions:

*Inventions and Scientific Discoveries* National Survey of Historic Sites and Buildings, 1964      *The story of some prairie inventions* Walter Prescott Webb, 1953\*      **Gente Decente** Leticia Magda Garza-Falcón, 2010-07-05 In his books *The Great Plains* *The Great Frontier* and *The Texas Rangers* historian Walter Prescott Webb created an enduring image of fearless white Anglo male settlers and lawmen bringing civilization to an American Southwest plagued with savage Indians and Mexicans So popular was Webb's vision that it influenced generations of historians and artists in all media and effectively silenced the counter narratives that Mexican American writers and historians were concurrently producing to claim their standing as gente decente people of worth These counter narratives form the subject of Leticia M Garza Falcón's study She explores how prominent writers of Mexican descent such as Jovita González Américo Paredes María Cristina Mena Fermina Guerra Beatriz de la Garza and Helena María Viramontes have used literature to respond to the dominative history of the United States which offered retrospective justification for expansionist policies in the Southwest and South Texas Garza Falcón shows how these counter narratives capture a body of knowledge and experience excluded from official histories whose facts often emerged more from literary techniques than from objective analysis of historical data      [A List of References for the History of Agricultural Technology](#) University of California, Davis. Agricultural History Center, 1979      **Land of the Underground Rain** Donald E. Green, 2014-07-03 The scarcity of surface water which has so marked the Great Plains is even more characteristic of its subdivision the Texas High Plains Settlers on the plateau were forced to use pump technology to tap the vast ground water resources the underground rain beneath its flat surface The evolution from windmills to the modern high speed irrigation pumps took place over several decades Three phases characterized the movement toward irrigation In the period from 1910 to 1920 large volume pumping plants first appeared in the region but due to national and regional circumstances these premature efforts were largely abortive The second phase began as a response to the drought of the Dust Bowl and continued into the 1950s By 1959 irrigation had become an important aspect of the flourishing High Plains economy The decade of the 1960s was characterized chiefly by a growing alarm over the declining ground water table caused by massive pumping and by investigations of other water sources *Land of the Underground Rain* is a study in human use and threatened exhaustion of the High Plains most valuable natural resource Ground water was so plentiful that settlers believed it flowed inexhaustibly from some faraway place or mysteriously from a giant underground river Whatever the source they believed that it was being constantly replenished and until the 1950s they generally opposed effective conservation of ground water A growing number of weak and dry wells then made it apparent that Plains residents were mining an exhaustible resource The Texas High Plains region has been far more successful in exploiting its resource than in conserving it The very success of its pump technology has produced its environmental crisis The problem brought about by the threatened exhaustion of this resource still awaits a solution This study is the first comprehensive history of irrigation on

the Texas High Plains and it is the first comprehensive treatment of the development of twentieth century pump irrigation in any area of the United States
