The Oxford Handbook of Queer and Trans Music Therapy Colin Andrew Lee, 2024-07-09 Music therapy is an established profession that is recognized around the world As a catalyst to promote health and wellbeing music therapy is both objective and explorative The Oxford Handbook of Queer and Trans Music Therapy QTMT is a celebration of queer trans bisexual and gender nonconforming identities and the spontaneous creativity that is at the heart of queer music making As an emerging approach in the 21st century QTMT challenges perspectives and narratives from ethnocentric and cisheteronormative traditions that have dominated the field Raising the

essential question of what it means to create queer and trans spaces in music therapy this book presents an open discourse on the need for change and new beginnings The therapists musicians and artists included in this book collectively embody and represent a range of theory research and practice that are central to the essence and core values of QTMT This book does not shy away from the sociopolitical issues that challenge music therapy as a dominantly white heteronormative and cisgendered profession Music as a therapeutic force has the potential to transform us in unique and extraordinary ways In this book music and words are presented as innovative equals in describing and evaluating QTMT as a newly defined approach

Insights From Music Therapy Practice and Research Jessica Atkinson, 2025-07-31 This book drawing on the author's 26 years as a music therapist explores experience and evidence in music therapy It asks which experiences count why and what is revealed of the cultures of music therapy when some experience is regarded as evidence and some is not At the heart of music therapy lies a nonverbal phenomenon shared musical encounter Those involved can recognise it and respond without words as insiders However what this experience is and how it relates to evidence is not widely explored in music therapy practice and research Furthermore the investigations which do exist tend to be verbal even when participants are nonverbal As an alternative this autoethnographic book honours the arts based encounters fundamental to music therapy by offering the reader their own arts based experience through poems images and more Through them the reader or Collaborator is invited to consider the other knowing which comes from arts based encounter and its value Using phenomenological and Aesthetic Critical Realist approaches this work argues that relational musical experience central to music therapy is valuable on its own terms as musically mediated therapeutic evidence of personhood This challenges the professional status quo which privileges verbal knowledge creation and evidence measured by outsiders
