Interpreting Quoted Speech in Prophetic Literature Samuel Hildebrandt, 2017-08-28 In *Interpreting Quoted Speech* Samuel Hildebrandt analyzes the literary phenomenon of one speaker quoting the words of another speaker within prophetic discourse. Challenging approaches that categorize these speech quotations and use them as direct windows into Israel's past, Hildebrandt makes a compelling case for reading quoted speech in its literary context. He presents a substantial method for such an interpretive approach, demonstrates its value in a detailed analysis of Jeremiah 2:1-3:5, and highlights the significance of quoted phrases in Jeremiah and other prophetic texts. *Interpreting Quoted Speech* marks an important contribution to the exploration of Jeremiah's discourse and polyphony, and due to its accessible methodology and exegesis, offers a model for further research in prophetic literature.

Maori and the State Richard S. Hill, 2010-04-01 Presenting the most recent research and written by an expert in the field, this examination explores the principal interrelationships between the British Crown and the Maori people in the 1950s and 1960s, when Crown assimilation policies intensified, and during the 1970s, when the pressure of the Maori renaissance encouraged policies and goals based on biculturalism. A subject central to New Zealand's culture, this is an important and historical analysis of the country and the wider issue of indigenous peoples' rights.

The eye and brain in macaque and man: Linear, areal and volumetric dimensions. With added miscellaneous data on eye and brain in macaque and man, and added dimensional data on eye and brain in non-primates ERIK C. CORTHOOT, 2014-04-07 This book determines representative values for dimensional parameters of the eye and brain in extant Homo modern man and Macaca fascicularis, Macaca mulatta, and Macaca nemestrina. Indeed, published values in the scientific literature for the dimensions of each of these organs in each of these species differ greatly; between studies, mean values published for a single parameter in a single species can differ by a factor of 1.25 for linear dimensions, a factor of 3 for areal dimensions, and a factor of 1.5 for volumetric dimensions. This book provides 3 progressive sets of information: First, Elementary Tables provide raw databases/lists of published values; Second, text in Chapters and Addenda provide new insights, critical analysis of these published values, and subsequent synthesis of representative values; Third, Chapter Summary Tables and Book Summary Tables provide distilled databases/lists of these representative values. This book is an unprecedented reference work, both because of the large number of published values in its raw databases and because of the well-founded size of the representative values in its distilled databases. This book is a comparative, comprehensive, and critical review of published data: comparative as it reviews data for man and macaques; comprehensive as it reviews data in a record number; critical as it reviews data with analysis and synthesis. Anyone can easily consult the 7 Chapter Summary Tables or the 3 Book Summary Tables for concise lists of representative values. Those who require more elaborate information can also consult the 100 pages of Elementary Tables or read the 200 pages of text in Chapters and Addenda. This remarkable book reports the results of an exhaustive, meticulous, and exceedingly thorough review of the complete published literature on the

dimensions of eye and brain in three species of macaque monkey and man Why would anyone be interested in this The measurements of linear areal and volumetric dimensions of eye and brain constitute necessary building blocks to derive profound implications for information processing which is of great interest to a wide variety of scientists It might appear unbelievable for someone who does not belong to these fields of research but the reported values differ greatly between studies sometimes up to a factor 3 This book reports the important values in succinct tables but also provides a critical analysis and synthesis of the literature which is a substantial contribution to neuro anatomy and neuro histology in its own right Sure to stand the test of time it will be on the shelves of a great many neuroscientists for years to come and many serious scientists from other disciplines will consult its content when it turns out to be the cornerstone of truly innovative and groundbreaking new theoretical claims on how the brain works Watch out for more to come by the same author Prof dr Johan Wagemans Faculty of Psychology and Educational Sciences KU Leuven Belgium This impressive piece of work provides a very detailed and comprehensive review of various anatomical measures of the eye and the brain of humans and macaque monkeys It lists what is known about the physical dimensions of eye and brain and more so shows how much we still need to learn about these important organs Prof dr Rufin Vogels Department of Neurosciences KU Leuven Belgium *Book Review Digest* ,2002

Characteristics and Functions of Direct Quotes in Hispanic Fiction Isolde J.
